PART I - BUSINESS AND GENERAL INFORMATION

Item 1. Business

Business Development

Empire East Land Holdings, Inc. (the "Company") was incorporated under Philippine law on 15 July 1994. Prior to its incorporation, the Company was a division of Megaworld Corporation (formerly, Megaworld Properties & Holdings, Inc.) and was then known as its Community Housing Division. In 1994, Megaworld Corporation decided to spin off its Community Housing Division into what is now the Company for the purpose of separating its high-end residential and office business from its lower and middle-income housing business. As of December 2012, Megaworld holds 78.58% of the Company.

As of December 31, 2012, the Company holds 100% equity interest in Eastwood Property Holdings, Inc. (EPHI); Valle Verde Properties, Inc. ("VVPI"); Sherman Oak Holdings, Inc. ("SOHI") and Empire East Communities, Inc. ("EECI"); 73% in Laguna BelAir School, Inc. (LBAS); 33% in Suntrust Properties, Inc. ("SPI") (formerly "Empire East Properties, Inc."); 60% in Sonoma Premier Land, Inc. ("SPLI") (formerly, "Galleria Corsini Holdings, Inc."); and 47% in Gilmore Property Marketing Associates, Inc. ("GPMAI").

EPHI, which was incorporated on September 5, 1996, serves as the marketing arm of the Company and markets the projects of the Company and those of other related parties.

SPI, which was incorporated on November 14, 1997, is a company that is engaged in the development and construction of affordable projects. In 2008, SPI increased its authorized capital stock and the Company subscribed to 262.5 million common shares at P1.00 par value, paid by way of conversion of advances into equity, resulting in an increase in the Company's ownership in SPI from 40% to 80%. In 2011, the percentage ownership of the Company in SPI was reduced to 33% due to Megaworld's subscription to SPI's increase in capital stock.

VVPI was incorporated on October 13, 2006. In 2008, the Company acquired shares of VVPI from another stockholder increasing the Company's ownership in VVPI to 100%.

SPLI was incorporated on February 26, 2007 and started its commercial operations in 2008. In 2008, 200 million shares in SPLI were acquired by the Company, increasing its ownership to 60% from 20%.

EECI was incorporated on October 14, 2008 and is wholly owned by the Company. It acts as a marketing arm of the Company.

SOHI was incorporated on February 2, 2007. In January 2008, the Company acquired 100% ownership in SOHI.

GPMAI was incorporated on September 5, 1996 to acquire, lease and construct or dispose of properties. In 2010, the Company acquired 52% ownership in GPMAI by subscribing to 27M shares by way of conversion of advances into equity. In 2012, GPMAI issued 5M shares of stock to a third party which resulted to the decrease of Company's ownership to 47%.

LBAS is a company incorporated on February 13, 1996 and is presently operating a school for primary and secondary education. The Company owns 73% of LBAS.

Neither the Company nor its subsidiaries has been the subject of a bankruptcy, receivership or similar proceeding or has been involved in any material reclassification, merger, consolidation, or purchase or sale of a significant amount of assets not in the ordinary course of business except as otherwise stated herein.

Business of Issuer and Subsidiaries

Principal Products, Services and Markets

The Company is one of the key players in the Philippine real estate industry. Its core business is building, developing and selling residential properties ranging from mid-to-high-rise condominiums in prime locations in Metro Manila as well as single-detached homes in progressive suburban areas.

The Company has pioneered development concepts that constantly set trends in the local real estate arena. Its township-model and mixed-use communities have provided residents with convenient access to urban-living essentials such as business districts, shopping centers, academic institutions and medical facilities. Readily available retail arcades, worship places, learning hubs and recreational amenities add value to most of the Company's projects.

The breakthrough Transit-Oriented Developments or TODs introduced by the Company have proven to be a highly marketable concept. Its various multi-cluster condominium communities directly linked to mass-transit systems such as MRT-3 and LRT-2 have provided faster and more efficient mobility in the metro.

The Company has continuously set the platform for prospective homebuyers to choose their well-deserved lifestyle. Its affordable and flexible payment terms provide home buyers the opportunity to avail of residential units at no downpayment and interest-free schemes. The Company likewise extends pro-active after-sales support, efficient property management and long-term client relations ensuring customer satisfaction.

Contribution to Sales and Revenues

In 2012, the income from sales of various condominium units and house-and-lot packages accounted for 55% of total revenues. Finance income, the bulk of which came from in-house financing of units sold to buyers, accounted for 19%. The commission income of a subsidiary of the Company realized from marketing of real properties of related parties, rentals and other business related sources accounted for the remaining 26% of total revenues. Foreign sales contributed minimally to the Group's consolidated sales and revenues for the year 2012.

The percentage of contribution to revenues of the above products and services differs from their percentage of contribution to net income since certain revenues do not have corresponding expenses and some expenses are not identifiable with projects.

Distribution Methods

The Company's core in-house sales team, Empire East Elite (EEE), can cross-sell all condominium and horizontal projects. Another in-house sales team, Empire East Communities (EEC), focuses in marketing one particular project. Both EEE and EEC sales teams are composed of Real Estate Consultants, Sales Managers and Directors for Sales who closely monitor current market conditions and help promote the Company's projects through various sales strategies including leafleting, showroom and exhibit manning, outdoor saturation, telemarketing, online selling, and open house activities.

Also, the Company has satellite sales offices in key cities outside Metro Manila where salespersons of the team called Empire East Networks (EEN) are based. Currently, regional groups of EEN are deployed in Baguio City for North Luzon, Pampanga for Central Luzon and Batangas City for South Luzon. The Company likewise draws support from its accredited licensed brokers in marketing its projects. Tie-ups with private companies and organization have been initiated by the Company to provide corporate housing programs for their executives and employees.

Aside from its showrooms in project sites and major malls, the Company utilizes all forms of traditional and below-the-line advertising media. Print ads in broadsheets and magazines,

graphic billboards, LED displays, lamp post banners and directional signages are some of the tools that the Company has been using in promoting its projects. To further increase its visibility and establish stronger brand image, the Company intensively launched its "Life is at Empire East" advertising campaign using mini-billboards in bus stops along major roads like EDSA and Commonwealth, wrap-up ads in city bus lines, and transit top ads in jeepneys.

Update on Projects

Pioneer Woodlands is the Company's first TOD project. This multi-tower development sits at the corner of EDSA and Pioneer Street in Mandaluyong City. It is physically connected to the Boni Avenue Station of MRT 3. The first two towers are expected to be completed by the end of 2013.

Little Baguio Terraces is a four-tower project strategically located between two major roads, and sits right on the boundary of two cities, San Juan and Quezon City. It is also set between J. Ruiz and Gilmore stations of the LRT Line 2. The first tower is expected to be completed in 2013.

San Lorenzo Place is an upscale high-rise development along EDSA corner Chino Roces Avenue in Makati City. It features a high-end shopping mall on its podium with a direct link to MRT-3 Magallanes station that can easily bring its future dwellers to Makati central business district (CBD) and the rest of Metro Manila. Completion of construction is expected by the end of 2014 for Tower 4, 2015 for Tower 1 and 2017 for Tower 2.

Laguna BelAir is the Company's flagship township project outside Metro Manila. This 156-hectare development, located in Sta. Rosa City in Laguna, is composed of several residential phases. The project is approximately 45 minutes away from the Makati central business district and 10 minutes away from an industrial zone.

The Cambridge Village is a multi-cluster, large-scale residential development located at the boundary of the Pasig-Cainta area. Some clusters have been completed while construction is still on-going for the remaining clusters.

The Sonoma is the second township project of the Company outside Metro Manila. This 50-hectare community in Santa Rosa City features four residential phases with a 2.5-hectare amenity zone. Homebuyers can opt for lots only or house-and-lot packages with Asian Modern homes. Land development is ongoing.

The Rochester is an Asian-inspired exclusive community in Pasig City that features mid-rise and high-rise residential buildings. The project is in close proximity to the business districts of Bonifacio Global City, Ayala and Ortigas, which makes it a favorable address for working professionals.

The Rochester currently features the six-story Garden Villas 1 and 2, the 14-story Breeze Tower and the Parklane Tower, which are slated for completion beginning 2014.

Kasara Urban Resort Residences is the first resort-inspired community that will soon rise near C5 Road in Pasig City. This six-tower enclave sits on a 1.9-hectare property between Eagle Avenue and P. Antonio Street in Barangay Ugong, Pasig City, and boasts of water features such as a lake-inspired swimming pool, infinity pools, waterfalls, bubblers, kiddie pools and koi ponds.

Southpoint Science Park, a 31-hectare property located at Gimalas, Balayan, Batangas to be developed into a mixed-use development.

Competition

The industry has continuously witnessed the aggressive launching of new developments by key real estate players. The Company has maintained its competitive advantage in terms of prime location and affordable payment terms.

Various condominiums by other developers are being marketed in the vicinity of Pioneer Woodlands, such as SMDC's 3-tower Light Residences, Flair Towers by DMCI, Avida Centera by Avida Land, Gateway Regency by Robinsons Land, and Axis Residences by RLC-Federal Land. Although these projects fall within a common price range, the Company offers the most affordable payment terms.

Within the vicinity of San Juan City, Sta. Mesa Manila, and New Manila, the major competitors of Little Baguio Terraces are Magnolia Residences by Robinsons, Amaia Skies Sta. Mesa, Sorrel and Accolade Place by DMCI, and Princeton and Mezza II Residences by SMDC. With options of availing RFO units and shorter waiting period for turnover, the demand for residential spaces in the said area has continuously gone high.

Makati Central Business District has been a constant battleground for major players. San Lorenzo Place competes with Avida Towers San Lorenzo, Belton Place by Eton Properties, The Linear by Filinvest, Signa Designer Residences by RLC, and Jazz Residences by SMDC. The competitive edge of San Lorenzo Place is its TOD concept.

Santa Rosa City in Laguna, being the center of CALABARZON development, is the hotspot of real estate competition in the south of Metro Manila. Currently, The Sonoma is competing with huge developments with various segmented projects, such as Mirala, Avida Settings, Avida Village and Venare all in Ayala Land's Nuvali, West Wing and Tierra Bela both in Eton City, Pramana and Solen in Greenfield City, Chateaux de Paris and Nirwana Bali in South Forbes Golf City by Cathay Land, and Augusta by Brittany. The Company strives to sustain lead in the area by offering more competitive payment packages.

The Company's Pasig City projects, The Rochester and Kasara Urban Resort Residences, are in a highly competitive location. Its major competitors include Camella Condo Homes along Mercedes Avenue, The Grove by Rockwell and Grace Residences by SMDC both along C-5 Road, Acacia Escalades by RLC, Circulo Verde by Ortigas and Company, and Rose Residences (formerly M-Place) in Ortigas. The Cambridge Village is directly competing with other RFO projects such as One Oasis and Capri Oasis by Filinvest, Riverfront Residences and East Raya Gardens by DMCI, and Hampton Gardens by Dynamic Realty.

Sources and Availability of Raw Materials/Suppliers

The Company has a broad base of suppliers of materials and services and is not dependent on any one supplier.

Dependence on Certain Customers

The Company has a broad customer base and is not dependent on a single customer or few customers.

Transactions with and/or Dependence on Related Parties

The Company paid a management/leasing fee of P1.5 million to an affiliate for the management/leasing of parking slots and some commercial units. In 2012, total commissions earned by a subsidiary from the sale of its parent company's real estate properties amounted to P149.6 million.

The Company, in the normal course of business, enters into transactions with related companies primarily consisting of lease of properties and advances for real estate transactions, working capital requirements and other business-related purposes. Rental for leased properties and interest on interest-bearing advances are within market rates. The related parties that have entered into transactions with the Company are identified in Schedules C & F of the SEC Supplementary Schedules as of December 31, 2012. Related parties are able to settle their obligations in connection with transactions with the Company and the Company does not foresee risks or contingencies arising from these transactions. Additional information on related party transactions is provided in Item 22 of the Notes to the Audited Consolidated Financial Statements of the Company and its Subsidiaries attached as Exhibit 1 hereof and incorporated herein by reference.

Other than those disclosed in the Company's Financial Statements, the Company has not entered into other related party transactions

Patents, Trademarks and Copyrights

The operations of the Company and its subsidiaries (the "Group") are not dependent on any copyright, patent, trademark, license, franchise, concession or royalty agreement.

Need for Government Approval of Principal Products and Services//Effect of Existing or Probable Government Regulations

Philippine land use laws regarding subdivisions and condominiums include zoning laws, which regulate land use, laws which specify standards and technical requirements for the development of subdivisions, and laws requiring licenses to be obtained before the sale of real estate property.

The municipal or city authority determines whether the plans of a proposed development comply with the applicable standards and conducts a preliminary inspection of the site. Local authorities are required to monitor the progress of subdivision projects and to inspect projects following their completion to determine whether or not they comply with the approved plans.

There are essentially two different types of residential subdivision developments, which are distinguished by different development standards issued by the HLURB. The first type of subdivision, aimed at low-cost housing, must comply with Batas Pambansa Blg. 220, which allows for a higher density of building and relaxes some of the construction standards. Other subdivisions must comply with Presidential Decree No. 957, which sets out standards for lower density developments. Both types of subdivision must comply with standards regarding the suitability of the site, road access, necessary community facilities, open spaces, water supply, the sewage disposal system, electricity supply, lot sizes, the length of the housing blocks and house construction.

Under Presidential Decree No. 957, which covers subdivision projects for residential, commercial, industrial or recreational purposes and condominium projects for residential or commercial purposes, the HLURB, together with local government units, has jurisdiction to regulate the real estate trade and business. All subdivision plans are required to be filed with and approved by the local government unit concerned, while condominium project plans are required to be filed with and approved by HLURB. Approval of such plans is conditioned on, among other things, completion of the acquisition of the project site and the developer's financial, technical and administrative capabilities. Alterations of approved plans that affect significant areas of the project, such as infrastructure and public facilities, also require the prior

approval of the relevant government unit. Development must comply with standards regarding the suitability of the site, road access, necessary community facilities, open spaces, water supply, the sewage disposal system, electricity supply, lot sizes and house construction.

Owners or dealers of real estate projects are required to obtain licenses to sell before making sales or other disposition of lots or real estate projects.

In general, developers of residential subdivisions are required to submit project descriptions to regional offices of the Department of Environment and Natural Resources ("DENR"). This description sets out the background of the proposed project and identifies any significant environment risks and possible alternative sites. In environmentally critical projects or at the discretion of the regional office of the DENR, a detailed Environmental Impact Assessment may be required and the developer will be required to obtain an Environmental Compliance Certificate to certify that the project will not cause an unacceptable environmental impact.

The Company routinely applies for the required governmental approvals for its projects as provided above and some HLURB approvals such as but not limited to development permits and license to sell are pending for certain projects or project phases.

The Company is not aware of any pending legislation or governmental regulation that is expected to materially affect its business.

Research and Development Costs

Expenses incurred for research are minimal and do not amount to a significant percentage of revenues.

On the other hand, construction and development costs incurred and their percentage to revenues are as follows:

Year	Amount Spent	% to Revenue
2012	P2.54 billion	101%
2011	P2.17 billion	111%
2010	P1.58 billion	70%

Costs and Effects of Compliance with Environmental Laws

Expenses incurred by the Group for purposes of complying with environmental laws consist primarily of payments for government regulatory fees that are standard in the industry and are minimal.

Manpower

As of December 31, 2012, the Group employed a total of 477 employees. The Group will hire additional employees if and when the present workforce becomes inadequate to handle the growing operations of the Group. The Group has no collective bargaining agreements with its employees due to the absence of organized labor organizations in the Group. Aside from complying with the minimum compensation standards mandated by law, the Group makes available to qualified personnel supplemental benefits such as health insurance, retirement, housing plans and car plans.

The table below shows the breakdown of employees by rank:

Description	As of December 31, 2012	Projected Hiring for 2013
Executives	19	0
Managers	48	5
Supervisors	80	10
Rank & Files	330	32
Total	477	47

Business Risks

The real estate industry is highly dependent on the performance of the national economy as the growth of the industry has a direct correlation with the state of the national income and effective disposal income of the people. As disposable income increases, expenditures on housing will increase proportionately. Furthermore, a stable economy brings about liquidity in the financial system, thus increasing the sources of funding for housing.

The growth and profitability of the Company are influenced by the general political and economic situation. Any political instability in the future may have a material effect on the financial results of the Company.

Increase in interest rates and unavailability of affordable financing options affect the demand for housing. The Company caters to the middle income market, a market which primarily considers the affordability of monthly amortizations through long term in-house or bank financing schemes.

The Company is engaged primarily in the development of land and construction of housing /condominium units. Its business is dependent on the availability of large tracts of land with potential for development. As major players and new ones continue to take advantage of the bullish condition of the real estate industry, prime properties may become less available to the Company.

Other risks related to property development are fluctuation in prices and availability of construction materials, changes in government regulations, increase in taxes and fees and intense competition.

The Company remains vigilant to factors affecting its business, such as fluctuations in interest rates on borrowings and end-buyers' financing, increasing costs of construction materials, labor and administrative expenses which may affect overall demand for housing. Fluctuations in foreign exchange have no adverse effect since the Company has very minimal importations of construction-related materials and has no foreign currency denominated loans.

The Company continuously monitors trends in the industry and regularly checks economic indicators. It constantly explores ways and means on how to be more cost effective and implements reasonable price increases to maintain certain profit margins while keeping its products competitive. To maintain the marketability of its products, it provides quality projects in convenient locations, keeps the price affordable, offers a variety of flexible payment terms for in-house financing and continues to maintain strong tie-up arrangements with various banks for the financing requirements of its buyers.

The Company remains prudent in managing its financial resources and has taken measures in controlling its available funds. Generally, the Company utilizes its internally generated funds for its operations and partly uses bank financing for purposes of acquiring properties with

strong economic potential and meeting urgent development requirements. By identifying the risk areas and employing appropriate risk management tools, the Company believes that the related business risks could be managed properly.

Dividends

The payment of dividends, either in the form of cash or stock, will depend upon the Company's earnings, cash flow and financial condition, among other factors. The Company may declare dividends only out of its unrestricted retained earnings. These represent the net accumulated earnings of the Company, with its capital unimpaired, that are not appropriated for any other purpose.

The Company may pay dividends in cash, by the distribution of property, or by the issue of shares of stock. Dividends paid in cash are subject to the approval by the Board of Directors. Dividends paid in the form of additional shares are subject to approval by both the Board of Directors and at least two-thirds (2/3) of the outstanding capital stock of the shareholders at a shareholders' meeting called for such purpose.

No stock dividends were declared on the Company's common shares for 2007 to 2012. The Company declared a 15% stock dividend on March 15, 2006, which was paid on August 8, 2006 to all shares of common stock outstanding as of July 13, 2006.

The Corporation Code prohibits stock corporations from retaining surplus profits in excess of one hundred per cent (100%) of their paid-in capital stock, except when justified by definite corporate expansion projects or programs approved by the Board of Directors, or when the corporation is prohibited under any loan agreement with any financial institution or creditor from declaring dividends without its consent, and such consent has not yet been secured, or when it can be clearly shown that such retention is necessary under special circumstances obtaining in the corporation.

Recent Sales of Unregistered or Exempt Securities

On 30 October 2012, 2,695,239,834 new common shares issued to stockholders pursuant to a 1:4 pre-emptive stock rights offer were listed with the Philippine Stock Exchange. The rights shares were issued at Php1.00 per share.

Relative to the Company's pre-emptive rights offer, the Company filed with the Philippine Securities and Exchange Commission ("SEC") an Application for Confirmation of Exempt Transaction pursuant to the Securities Regulation Code (SRC). On August 24, 2012, the SEC issued an order confirming that the rights offer is an Exempt Transaction under Section 10.1 (e) and (i) of the SRC.

Consolidated revenues, composed of real estate sales, finance, commissions and other revenues which posted an increase of 29% from P1.95 billion to P2.52 billion. The increase in revenue is mainly due to increase in sales from various projects.

Real Estate Sales

The Group registered Real Estate Sales of P1.38 billion for twelve months ended December 31, 2012 compared with P.98 billion in 2011. The sales were derived from various projects namely, Pioneer Woodlands, San Lorenzo Place, The Sonoma, Little Baguio Terraces, The Cambridge Village, California Garden Square, Greenhills Garden Square and Laguna BelAir.

The Cost of Sales amounting to P906.3 million in 2012 and P746.1 million in 2011, as a percentage of Real Estate Sales, was 66% and 76%, respectively. The change was primarily due to the type of products sold for each year.

Gross Profit was P475.1 million during the twelve months of 2012 and P237.4 million in 2011, or 34% and 24% of Real Estate Sales, respectively. The gross profit margin varies depending on the product mix and the competitiveness of prices of each product. Realized Gross Profit as a percentage of Real Estate Sales was recorded at 30% and 25% amounting to P411.5 million and P243.1 million in 2012 and 2011, respectively.

Other Revenues

The Finance income amounting to P490.9 million and P381.4 million in 2012 and 2011 respectively, were derived mostly from in-house financing and accounts for 19% and 20% of total revenues. Commission and other income totaling P569.8 million in 2012 and P481.7 million in 2011, represents 23% and 25% of total revenues, respectively. The other income includes rentals of investment property and residential/commercial spaces in various projects, equity in net earnings from associates and those obtained from other sources.

Operating Expenses

Operating Expenses posted an increase from P0.78 billion in 2011 to P1.04 billion in 2012. Corporate overhead increased due to additional expenses incurred in promoting sales, additional manpower to support the operations and general increase in commodities/services. Other charges/expenses include Finance Cost of P84.2 million and P51.6 million in 2012 and 2011, respectively.

FINANCIAL CONDITION

PART IV – CORPORATE GOVERNANCE

Item 14. Compliance with Leading Practices on Corporate Governance

In 2002, the Company adopted a Manual on Corporate Governance in order to institutionalize the principles of good corporate governance in the entire organization. Pursuant to the Company's Manual on Corporate Governance, the Company's Board of Directors created each of the following committees and appointed board members thereto.

Audit Committee

The Audit Committee assists the Board in the performance of its oversight responsibility for the financial reporting process, system of internal control, audit process and monitoring of compliance with applicable laws, rules and regulations, provides oversight over financial management functions and over internal and external auditors and the financial statements of the Company. On October 3, 2012, the Board approved the Audit Committee Charter which provides for the purpose, membership, structure, operations, duties and responsibilities of the Audit Committee. The Audit Committee has three members, two of whom are independent directors. An independent director serves as the head of the committee.

Compensation and Remuneration Committee

The Compensation and Remuneration Committee is responsible for establishing a formal and transparent procedure for developing a policy on remuneration of the directors and officers to ensure that their compensation is consistent with the Company's culture, strategy and the business environment in which it operates. The Compensation and Remuneration Committee consists of three members, including at least one independent director.

Nomination Committee

The Nomination Committee reviews and evaluates the qualifications of all persons nominated to the Board and other appointments that require Board approval. The Nomination Committee has three members, including at least one independent director.

In 2005, the Company engaged the services of the Institute of Corporate Directors (ICD) to facilitate a Corporate Governance Training/Seminar for its Board of Directors and executives. The Training/Seminar included a discussion on the Main Principles of Corporate Governance contained in the Organization for Economic Cooperation and Development (OECD), the Pacific Economic Cooperation Council (PECC) and the Philippine SEC Corporate Governance Code, Responsible Citizenship and Corporate Social Responsibility, Finance in the Corporate

Governance Setting and Best Practices of Corporate Governance. In 2004 and 2006, the Company, while retaining the services of Punongbayan & Araullo as external auditor, designated new engagement partners for the audit of the financial statements of the Company beginning the year ending December 31, 2004 and December 31, 2006, in compliance with its Manual on Corporate Governance, which requires that the Company's external auditor be rotated or the handling partner changed every five (5) years or earlier. Also in 2004, the Company increased the number of independent directors in its Audit Committee, from one independent director to two (2) independent directors, and appointed an independent director to head the Audit Committee, in accordance with SEC Memorandum Circular No. 6.

Evaluation System

The Company has designated a Compliance Officer who is tasked with monitoring compliance with the provisions and requirements of its Manual on Corporate Governance. The Compliance Officer has established an evaluation system, patterned after the CG Scorecard of the Institute of Corporate Directors to measure or determine the level of compliance by the Company with its Manual.

Deviations from Manual and Sanctions Imposed

In 2012, the Company substantially complied with its Manual on Corporate Governance and did not materially deviate from its provisions.

No sanctions were imposed on any director, officer or employee on account of non-compliance with the Company's Manual on Corporate Governance.

Plan to Improve Corporate Governance

Pursuant to SEC Memorandum Circular No. 6, Series of 2009, the Company has revised its Manual of Corporate Governance to make the same compliant with the Revised Code of Corporate Governance. The Company will continue to adopt best practices in Corporate Governance as may be prescribed by the Commission.

The Board of Directors and Stockholders
Empire East Land Holdings, Inc. and Subsidiaries
(A Subsidiary of Megaworld Corporation)
21st Floor, The World Centre Building
330 Sen. Gil Puyat Avenue, Makati City

We have audited the accompanying consolidated financial statements of Empire East Land Holdings, Inc. and Subsidiaries, which comprise the consolidated statements of financial position as at December 31, 2012 and 2011, and the consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2012, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Philippine Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Philippine Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Empire East Land Holdings, Inc. and Subsidiaries as at December 31, 2012 and 2011, and their consolidated financial performance and their consolidated cash flows for each of the three years in the period ended December 31, 2012 in accordance with Philippine Financial Reporting Standards.

- (d) Subsidiary incorporated in 2008 to primarily engage in the purchase, development, sale and lease of real properties but is currently engaged in the marketing of real estate properties.
- (e) Subsidiary incorporated in 1996 to primarily engage in operating a school for primary and secondary education.
- (f) Subsidiary incorporated in 2007 as a holding entity to primarily engage in the development and marketing of all kinds of real estate. Additional shares acquired from First Centro, Inc. in March and June 2008. SPLI has not yet started commercial operations.
- (g) In 2012, the entity was deconsolidated and treated as an associate of the Group.
- (h) In 2011, the entity was deconsolidated and treated as an associate of the Group.

On December 26, 2012, GPMAI issued additional 5,000,000 shares of stock at P1 par value which were purchased by a third party. As a result, the percentage of ownership of the Company over GPMAI was reduced from 52% to 47%. In addition, the Company is no longer part of the board of directors of GPMAI, thereby losing its control over the financial and operating policies. GPMAI is now an associate.

Prior to March 25, 2011, the Company held 80% ownership interest in SPI and, thus, was a consolidated subsidiary in 2010. On March 25, 2011, the percentage ownership of the Company over SPI was reduced to 33% due to the subscription by Megaworld Corporation (Megaworld) to SPI's increase in authorized capital stock. Accordingly, SPI is now treated as an associate.

In prior years, the Company increased its ownership interest in VVPI and LBASI. This resulted to the recognition of goodwill which amounted to P78.3 million as of December 31, 2012 and 2011, and shown as Goodwill in the consolidated statements of financial position.

Starting June 2011, the Company became a subsidiary of Megaworld. The intermediate parent company, Megaworld, is engaged in the development of large scale mixed-use planned communities or townships that integrate residential, commercial, leisure and entertainment components. The ultimate parent company, Alliance Global Group, Inc. (AGI), is a holding company with diversified investments in real estate, food and beverages, manufacturing, quick service restaurant and tourism-oriented businesses. The shares of common stock of both Megaworld and AGI are listed at the PSE.

The registered office of the Company is located at the 21st Floor, The World Centre Building, 330 Sen. Gil Puyat Avenue, Makati City. Megaworld's registered office is on the 28th Floor of the same building. On the other hand, AGI's registered office is located at the 7th Floor 1880 Eastwood Avenue, Eastwood City CyberPark, 188 E. Rodriguez Jr. Avenue, Quezon City. These entities' registered offices are also their respective principal places of business.

The consolidated financial statements of Empire East Land Holdings, Inc. and Subsidiaries (the Group) for the year ended December 31, 2012 (including comparatives for the years ended December 31, 2011 and 2010) were authorized for issue by the Company's Board of Directors (BOD) on March 1, 2013.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies that have been used in the preparation of these consolidated financial statements are summarized in the succeeding pages. The policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of Preparation of Consolidated Financial Statements

(a) Statement of Compliance with Philippine Financial Reporting Standards

The consolidated financial statements of the Group have been prepared in accordance with Philippine Financial Reporting Standards (PFRS). PFRS are adopted by the Financial Reporting Standards Council (FRSC) from the pronouncements issued by the International Accounting Standards Board (IASB).

The consolidated financial statements have been prepared using the measurement bases specified by PFRS for each type of asset, liability, income and expense. The measurement bases are more fully described in the accounting policies that follow.

(b) Presentation of Financial Statements

The consolidated financial statements are presented in accordance with Philippine Accounting Standard (PAS) 1, *Presentation of Financial Statements*. The Group presents all items of income and expenses in a single statement of comprehensive income.

Two comparative periods are presented for the consolidated statement of financial position when the Group applies an accounting policy retrospectively, makes a retrospective restatement of items in its consolidated financial statements, or reclassifies items in the consolidated financial statements.

(c) Functional and Presentation Currency

These consolidated financial statements are presented in Philippine pesos, the functional and presentation currency of the Group, and all values represent absolute amounts except when otherwise indicated.

Items included in the consolidated financial statements of the Group are measured using the currency of the primary economic environment in which the Group operates.

2.2 Adoption of New and Amended PFRS

(a) Effective in 2012 that are Relevant to the Group

In 2012, the Group adopted the following amendments to PFRS that are relevant to the Group and effective for consolidated financial statements for the annual period beginning on or after July 1, 2011 or January 1, 2012:

PFRS 7 (Amendment)	:	Financial Instruments: Disclosures – Transfers of Financial Assets
PAS 12 (Amendment)	:	Income Taxes – Deferred Taxes: Recovery of Underlying Assets

Discussed below are the relevant information about these amended standards.

- (i) PFRS 7 (Amendment), *Financial Instruments: Disclosures – Transfers of Financial Assets*. The amendment requires additional disclosures that will allow users of consolidated financial statements to understand the relationship between transferred financial assets that are not derecognized in their entirety and the associated liabilities; and, to evaluate the nature of, and risk associated with any continuing involvement of the reporting entity in financial assets that are derecognized in their entirety.

The Group did not transfer any financial asset involving this type of arrangement; hence, the amendment did not result in any significant change in the Group's disclosures in its consolidated financial statements.

- (ii) PAS 12 (Amendment), *Income Taxes – Deferred Tax: Recovery of Underlying Assets*. The amendment introduces a rebuttable presumption that the measurement of a deferred tax liability or asset that arises from investment property measured at fair value under PAS 40, *Investment Property* should reflect the tax consequence of recovering the carrying amount of the asset entirely through sale. The presumption is rebutted for depreciable investment property (e.g., building) that is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the asset over time, rather than through sale. Moreover, Standing Interpretation Committee (SIC) 21 *Income Taxes – Recovery of Revalued Non-Depreciable Assets*, is accordingly withdrawn and is incorporated under PAS 12 requiring that deferred tax on non-depreciable assets that are measured using the revaluation model in PAS 16, *Property, Plant and Equipment* should always be measured on a sale basis of the asset. The amendment has no significant impact on the Group's consolidated financial statements as the Group has no investment properties which are measured at fair value.

- (b) *Effective in 2012 that is not Relevant to the Group*

PFRS 1, *First-time Adoption of PFRS*, was amended to provide relief for first-time adopters of PFRS from having to reconstruct transactions that occurred before the date of transition to PFRS and to provide guidance for entities emerging from severe hyperinflation either to resume presenting PFRS financial statements or to present PFRS financial statements for the first time. The amendment became effective for annual periods beginning on or after July 1, 2011 but is not relevant to the Group's consolidated financial statements.

(c) *Effective Subsequent to 2012 but not Adopted Early*

There are new and amended PFRS that are effective for periods subsequent to 2012. Management has initially determined the following pronouncements, which the Group will apply in accordance with their transitional provisions, to be relevant to its consolidated financial statements:

- (i) PAS 1 (Amendment), *Financial Statements Presentation – Presentation of Items of Other Comprehensive Income* (effective from July 1, 2012). The amendment requires an entity to group items presented in other comprehensive income into those that, in accordance with other PFRS: (a) will not be reclassified subsequently to profit or loss; and, (b) will be reclassified subsequently to profit or loss when specific conditions are met. The Group's management expects that this will change the current presentation of items in other comprehensive income (i.e., unrealized fair value gains and losses on AFS financial assets).
- (ii) PAS 19 (Amendment), *Employee Benefits* (effective from January 1, 2013). The amendment made a number of changes as part of the improvements throughout the standard. The main changes relate to defined benefit plans as follows:
 - eliminates the corridor approach under the existing guidance of PAS 19 and requires an entity to recognize all gains and losses arising in the reporting period;
 - streamlines the presentation of changes in plan assets and liabilities resulting in the disaggregation of changes into three main components of service costs, net interest on net defined benefit obligation or asset, and remeasurement; and,
 - enhances disclosure requirements, including information about the characteristics of defined benefit plans and the risks that entities are exposed to through participation in them.

Currently, the Group is using the corridor approach and its unrecognized actuarial loss as of December 31, 2012 amounted to P20.4 million which will be retrospectively recognized as loss in other comprehensive income in 2013 (see Note 20.2).

(iii) Consolidation Standards

The Group is currently reviewing the impact on its consolidated financial statements of the following consolidation standards which will be effective from January 1, 2013:

- PFRS 10, *Consolidated Financial Statements*. This standard builds on existing principles of consolidation by identifying the concept of control as the determining factor in whether an entity should be included within the consolidated financial statements. The standard also provides additional guidance to assist in determining control where this is difficult to assess.

- PFRS 11, *Joint Arrangements*. This standard provides a more realistic reflection of joint arrangements by focusing on the rights and obligations of the arrangement, rather than its legal form. This standard replaces the three categories under PAS 31, mainly, jointly controlled entities, jointly controlled operations and jointly controlled assets, with two new categories – joint operations and joint ventures. Moreover, this also eliminates the option of using proportionate consolidation for joint ventures.
- PFRS 12, *Disclosure of Interest in Other Entities*. This standard integrates and makes consistent the disclosure requirements for all forms of interests in other entities, including joint arrangements, associates, special purpose vehicles and unconsolidated structured entities. This also introduces new disclosure requirements about the risks to which an entity is exposed from its involvement with structured entities.
- PAS 27 (Amendment), *Separate Financial Statements*. This revised standard now covers the requirements pertaining solely to separate financial statements after the relevant discussions on control and consolidated financial statements have been transferred and included in PFRS 10. No new major changes relating to separate financial statements have been introduced as a result of the revision.
- PAS 28 (Amendment), *Investments in Associate and Joint Venture*. This revised standard includes the requirements for joint ventures, as well as associates, to be accounted for using equity method following the issuance of PFRS 11.

Subsequent to the issuance of the foregoing consolidation standards, the IASB made some changes to the transitional provisions in International Financial Reporting Standard (IFRS) 10, IFRS 11 and IFRS 12, which were also adopted by the FRSC. The guidance confirms that an entity is not required to apply PFRS 10 retrospectively in certain circumstances and clarifies the requirements to present adjusted comparatives. The guidance also made changes to PFRS 10 and PFRS 12 which provide similar relief from the presentation or adjustment of comparative information for periods prior to the immediately preceding period. Further, it provides relief by removing the requirement to present comparatives for disclosures relating to unconsolidated structured entities for any period before the first annual period for which PFRS 12 is applied.

- (iv) PFRS 7 (Amendment), *Financial Instruments: Disclosures – Offsetting Financial Assets and Financial Liabilities* (effective from January 1, 2013). The amendment requires qualitative and quantitative disclosures relating to gross and net amounts of recognized financial instruments that are set-off in accordance with PAS 32, *Financial Instruments: Presentation*. The amendment also requires disclosure of information about recognized financial instruments which are subject to enforceable master netting arrangements or similar agreements, even if they are not set-off in the statement of financial position, including those which do not meet some or all of the offsetting criteria under PAS 32 and amounts related to a financial collateral. These disclosures will allow financial statement users to evaluate the effect or potential effect of netting arrangements, including rights of set-off associated with recognized financial assets and financial liabilities on the entity's financial position. The Group has initially assessed that the adoption of the amendment will not have a significant impact on its consolidated financial statements.
- (v) PFRS 13, *Fair Value Measurement* (effective from January 1, 2013). This standard aims to improve consistency and reduce complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across PFRS. The requirements do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards. Management is in the process of reviewing its valuation methodologies for conformity with the new requirements and has yet to assess the impact of the new standard on the Group's consolidated financial statements.
- (vi) PAS 32 (Amendment), *Financial Instruments: Presentation – Offsetting Financial Assets and Financial Liabilities* (effective from January 1, 2014). The amendment provides guidance to address inconsistencies in applying the criteria for offsetting financial assets and financial liabilities. It clarifies that a right of set-off is required to be legally enforceable, in the normal course of business; in the event of default; and in the event of insolvency or bankruptcy of the entity and all of the counterparties. The amendment also clarifies the principle behind net settlement and provided characteristics of a gross settlement system that would satisfy the criterion for net settlement. The Group does not expect this amendment to have a significant impact on its consolidated financial statements.
- (vii) PFRS 9, *Financial Instruments: Classification and Measurement* (effective from January 1, 2015). This is the first part of a new standard on financial instruments that will replace PAS 39, *Financial Instruments: Recognition and Measurement*, in its entirety. This chapter covers the classification and measurement of financial assets and financial liabilities and it deals with two measurement categories for financial assets: amortized cost and fair value. All equity instruments will be measured at fair value while debt instruments will be measured at amortized cost only if the entity is holding it to collect contractual cash flows which represent payment of principal and interest. The accounting for embedded derivatives in host contracts that are financial assets is simplified by removing the requirement to consider whether or not they are closely related, and, in most arrangement, does not require separation from the host contract.

For liabilities, the standard retains most of the PAS 39 requirements which include amortized cost accounting for most financial liabilities, with bifurcation of embedded derivatives. The main change is that, in case where the fair value option is taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than in profit or loss, unless this creates an accounting mismatch.

To date, other chapters of PFRS 9 dealing with impairment methodology and hedge accounting are still being completed.

Further, in November 2011, the IASB tentatively decided to consider making limited modifications to IFRS 9's financial asset classification model to address certain application issues.

The Group does not expect to implement and adopt PFRS 9 until its effective date or until all chapters of this new standard have been published. In addition, management is currently assessing the impact of PFRS 9 on the consolidated financial statements and it plans to conduct a comprehensive study in the fourth quarter of 2014 of the potential impact of this standard prior to its mandatory adoption date to assess the impact of all changes.

(viii) Philippine IFRIC 15, *Agreements for Construction of Real Estate*. This Philippine interpretation is based on IFRIC interpretation issued by the IASB in July 2008 effective for annual periods beginning on or after January 1, 2009. The adoption of this interpretation in the Philippines, however, was deferred by the FRSC and Philippine Securities and Exchange Commission (SEC) after giving due considerations on various application issues and the implication on this interpretation of the IASB's on-going revision of the Revenue Recognition standard. This interpretation provides guidance on how to determine whether an agreement for the construction of real estate is within the scope of PAS 11, *Construction Contracts*, or PAS 18, *Revenue*, and accordingly, when revenue from the construction should be recognized. The main expected change in practice is a shift from recognizing revenue using the percentage of completion method (i.e., as a construction progresses, by reference to the stage of completion of the development) to recognizing revenue at completion upon or after delivery. The Group is currently evaluating the impact of this interpretation on its financial statements in preparation for its adoption when this becomes mandatorily effective in the Philippines.

(ix) 2009-2011 Annual Improvements to PFRS. Annual improvements to PFRS (2009-2011 Cycle) made minor amendments to a number of PFRS, which are effective for annual period beginning on or after January 1, 2013. Among those improvements, the following amendments are relevant to the Group but management does not expect a material impact on the Group's consolidated financial statements:

(a) PAS 1 (Amendment), *Presentation of Financial Statements – Clarification of the Requirements for Comparative Information*. The amendment clarifies the requirements for presenting comparative information for the following:

- Requirements for opening statement of financial position

If an entity applies an accounting policy retrospectively, or makes a retrospective restatement or reclassification of items that has a material effect on the information in the statement of financial position at the beginning of the preceding period (i.e., opening statement of financial position), it shall present such third statement of financial position.

Other than disclosure of certain specified information in accordance with PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*, related notes to the opening statement of financial position as at the beginning of the preceding period are not required to be presented.

- Requirements for additional comparative information beyond minimum requirements

If an entity presented comparative information in the financial statements beyond the minimum comparative information requirements, the additional financial statements information should be presented in accordance with PFRS including disclosure of comparative information in the related notes for that additional information. Presenting additional comparative information voluntarily would not trigger a requirement to provide a complete set of financial statements.

(b) PAS 16 (Amendment), *Property, Plant and Equipment – Classification of Servicing Equipment*. The amendment addresses a perceived inconsistency in the classification requirements for servicing equipment which resulted in classifying servicing equipment as part of inventory when it is used for more than one period. It clarifies that items such as spare parts, stand-by equipment and servicing equipment shall be recognized as property, plant and equipment when they meet the definition of property, plant and equipment, otherwise, these are classified as inventory.

(c) PAS 32 (Amendment), *Financial Instruments – Presentation – Tax Effect of Distributions to Holders of Equity Instruments*. The amendment clarifies that the consequences of income tax relating to distributions to holders of an equity instrument and to transaction costs of an equity transaction shall be accounted for in accordance with PAS 12. Accordingly, income tax relating to distributions to holders of an equity instrument is recognized in profit or loss while income tax related to the transaction costs of an equity transaction is recognized in equity.

2.3 Consolidation and Interests in Joint Ventures

The Company obtains and exercises control through voting rights. The Group's consolidated financial statements comprise the accounts of the Company and its subsidiaries (see Note 1), after the elimination of material intercompany transactions. All intercompany balances and transactions with subsidiaries, including income, expenses and dividends, are eliminated in full. Unrealized profits and losses from intercompany transactions that are recognized in assets are also eliminated in full. Intercompany losses that indicate impairment are recognized in the consolidated financial statements.

The financial statements of subsidiaries are prepared for the same reporting period as the Company's using consistent accounting principles.

The Company accounts for its investments in subsidiaries, transactions with non-controlling interests and interests in joint ventures as follows:

(a) Investments in Subsidiaries

Subsidiaries are all entities over which the Company has the power to control the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Subsidiaries are consolidated from the date the Company obtains control until such time that such control ceases.

The acquisition method is applied to account for acquired subsidiaries. This requires recognizing and measuring the identifiable assets acquired, the liabilities assumed and any non-controlling interest in the acquiree. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred and the equity interests issued by the Company, if any. The consideration transferred also includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred and subsequent change in the fair value of contingent consideration is recognized directly in profit or loss.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognizes any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

The excess of the consideration transferred the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the group's share of the identifiable net assets acquired is recognized as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognized directly in profit or loss as gain (see also Note 2.10).

(b) Investment in an Associate

Associate is an entity over which the Group is able to exert significant influence but not control and which are neither subsidiaries nor interests in a joint venture. Investments in associate are initially recognized at cost and subsequently accounted for using the equity method.

Acquired investment in associate is also subject to purchase accounting. However, any goodwill or fair value adjustment attributable to the share in the associate is included in the amount recognized as investment in associate. All subsequent changes to the share of interest in the equity of the associate are recognized in the carrying amount of the Group's investment. Changes resulting from the profit or loss generated by the associate are shown as Equity Share in Net Earnings of an Associate in the Group's consolidated statement of comprehensive income and therefore affect the net results of operations of the Group. These changes include subsequent depreciation, amortization or impairment of the fair value adjustments of the associate's assets and liabilities.

Changes resulting from other comprehensive income of the associate or items that have been directly recognized in the associate's equity, for example, resulting from the associate's accounting for AFS financial assets, are recognized in consolidated other comprehensive income or equity of the Group, as applicable. Any non-income related equity movements of the associate that arise, for example, from the distribution of dividends or other transactions with the associate's shareholders, are charged against the proceeds received or granted. No effect on the Group's net result or equity is recognized in the course of these transactions. However, when the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred obligations or made payments in behalf of the associate. If the associate subsequently reports profits, the Group resumes recognizing its share of those profits only after its share of the profits exceeded the accumulated share of losses that has previously not been recognized.

Unrealized gains on transactions between the Group and its associate are eliminated to the extent of the Group's interest in the associate. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associate have been changed where necessary to ensure consistency with the policies adopted by the Group.

(c) *Transactions with Non-controlling Interests*

The Group's transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transaction with the owners of the Group in their capacity as owners. The difference between the fair value of any consideration paid and the relevant share acquired of the carrying value of the net assets of the subsidiary is recognized in equity. Disposals of equity investments to non-controlling interests result in gains and losses for the Group that are also recognized in equity.

When the Group ceases to have control over a subsidiary, any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognized in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognized in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognized in other comprehensive income are reclassified to profit or loss.

(d) Interests in Joint Ventures

For interests in jointly controlled operations, the Group recognizes in its consolidated financial statements its share of the jointly controlled assets, any liabilities that it has incurred, its share of any liabilities incurred jointly with the other venturers in relation to the joint venture, any income from the sale or use of its share of the output of the joint venture, and any expenses that it has incurred in respect of its interest in the joint venture. No adjustment or other consolidation procedures are required for the assets, liabilities, income and expenses of the joint venture that are recognized in the separate financial statements of the venturers.

2.4 Financial Assets

Financial assets include cash and cash equivalents and other financial instruments. The Group classifies its financial assets, other than hedging instruments, into the following categories: financial assets at fair value through profit or loss (FVTPL), loans and receivables, held-to-maturity investments and AFS financial assets. Financial assets are assigned to the different categories by management on initial recognition, depending on the purpose for which the investments were acquired.

Regular purchases and sales of financial assets are recognized on their trade date. All financial assets that are not classified as at FVTPL are initially recognized at fair value, plus transaction costs. Financial assets carried at FVTPL are initially recognized at fair value and transaction costs are charged as expense and included in the profit or loss.

The Group's financial assets include financial assets at FVTPL, loans and receivables and AFS financial assets. A more detailed description of the financial assets is as follows:

(a) Financial Assets at FVTPL

This category includes financial assets that are either classified as held for trading or are designated by the entity to be carried at FVTPL upon initial recognition. A financial asset is classified in this category if acquired principally for the purpose of selling it in the near term or if so designated by management. Derivatives are also categorized as 'held for trading' unless they are designated as hedges. Assets in this category are classified as current assets if they are either held for trading or are expected to be realized within 12 months from the end of the reporting period.

Subsequent to initial recognition, the financial assets included in this category are measured at fair value with changes in fair value recognized in profit or loss. Financial assets (except derivatives and financial instruments originally designated as financial assets at FVTPL) may be reclassified out of FVTPL category if they are no longer held for the purpose of being sold or repurchased in the near term. In 2011, financial asset amounting to P5.8 million (nil in 2012) is presented as part of Financial assets at FVTPL in the consolidated statement of financial position.

(b) Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the receivables. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period which are classified as non-current assets.

Loans and receivables are subsequently measured at amortized cost using the effective interest method, less any impairment losses. Any change in their value is recognized in profit or loss. Impairment loss is provided when there is objective evidence that the Group will not be able to collect all amounts due to it in accordance with the original terms of the receivables. The amount of the impairment loss is determined as the difference between the assets' carrying amount and the present value of estimated cash flows discounted at the effective interest rate.

The Group's financial assets categorized as loans and receivables include Cash and Cash Equivalents, Trade and Other Receivables (excluding Advances to Suppliers and Contractors), Advances to Landowners and Joint Ventures, and Advances to Related Parties account in the consolidated statements of financial position. Cash and cash equivalents are defined as cash on hand, demand deposits and short-term, highly liquid investments readily convertible to known amounts of cash and which are subject to insignificant risk of changes in value.

(c) AFS Financial Assets

This category includes non-derivative financial assets that are either designated to this category or do not qualify for inclusion in any of the other categories of financial assets. They are included in non-current assets unless management intends to dispose of the investment within 12 months from the end of the reporting period.

All AFS are measured at fair value, unless otherwise disclosed, with changes in value recognized in other comprehensive income, net of any effects arising from income taxes. When the asset is disposed of or is determined to be impaired, the cumulative gain or loss recognized in the other comprehensive income is reclassified from the revaluation reserve to profit or loss and presented as a reclassification adjustment within other comprehensive income.

Reversal of impairment loss is recognized in other comprehensive income, except for financial assets that are debt securities which are recognized in profit or loss only if the reversal can be objectively related to an event occurring after the impairment was recognized.

All income and expenses, including impairment losses, related to financial assets that are recognized in profit or loss are presented as part of Finance Income and Finance Costs in the consolidated statement of comprehensive income.

For investment that are actively traded in organized financial markets, fair value is determined by reference to quoted market bid prices in the stock exchange at the close of business on the reporting period. For investments where there is no quoted market price, fair value is determined by reference to the current market value of another instrument which is substantially the same or is calculated based on the expected cash flows of the underlying net asset base of the investment.

Non-compounding interest and other cash flows resulting from holding financial assets are recognized in consolidated profit or loss when received, regardless of how the related carrying amount of the financial assets is measured.

Derecognition of financial assets occurs when the rights to receive cash flows from the financial instruments expire or are transferred and substantially all of the risks and rewards of ownership have been transferred.

2.5 Prepayments and Other Assets

Prepayments and other assets pertain to other resources controlled by the Group as a result of past events. They are recognized in the financial statements when it is probable that the future economic benefits will flow to the entity and the asset has a cost or value that can be measured reliably.

Other recognized assets of similar nature, where future economic benefits are expected to flow to the Group beyond one year after the end of the reporting period (or in the normal operating cycle of the business, if longer), are classified as other non-current assets.

2.6 Property and Equipment

Property and equipment, except land, are carried at acquisition cost or construction cost less subsequent depreciation and amortization and any impairment losses. Land held for use in rendering of services is stated at cost less any impairment losses.

The cost of an asset comprises its purchase price and directly attributable costs of bringing the asset to working condition for its intended use. Expenditures for additions, major improvements and renewals are capitalized; expenditures for repairs and maintenance are charged to expense as incurred.

Depreciation and amortization is computed on the straight-line basis over the estimated useful lives of the assets as follows:

Building and other improvements	5-25 years
Transportation equipment	5 years
Office furniture and equipment	3-5 years

Leasehold improvements are amortized over the term of the lease or lives of the improvements, whichever is shorter.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.17).

The residual values and estimated useful lives of property and equipment are reviewed, and adjusted if appropriate, at the end of each reporting period.

An item of property and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated profit or loss in the year the item is derecognized.

Fully depreciated and fully amortized assets are retained in the accounts until they are no longer in use and no further charge for depreciation and amortization is made in respect of those assets.

2.7 Investment Property

Investment property consists of building and office/commercial units for lease and a parcel of land held for capital appreciation and memorial lots for investment purposes. Investment property is stated at cost less accumulated depreciation and any impairment in value.

The cost of an investment property comprises its purchase price and any directly attributable expenditure. Expenditures for additions, major improvements and renewals are capitalized; expenditures for repairs and maintenance are charged to expense as incurred.

Depreciation for building and office/commercial units classified as investment property is computed on the straight-line basis over the estimated useful life of 20 years.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount (see Note 2.17).

An item of investment property is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the item) is included in the consolidated profit or loss in the year the item is derecognized.

2.8 Financial Liabilities

Financial liabilities which include Interest-bearing Loans and Borrowings, Trade and Other Payables (except tax-related liabilities), Advances from Related Parties and Other Current Liabilities (excluding deferred income), are recognized when the Group becomes a party to the contractual terms of the instrument. All interest-related charges incurred on a financial liability are recognized as an expense in the consolidated profit or loss under the caption Finance Costs in the consolidated statement of comprehensive income.

Interest-bearing loans and borrowings are raised for support of long-term funding of operations. They are recognized at proceeds received, net of direct issue costs. Finance charges are charged to profit or loss on an accrual basis using the effective interest method and are added to the carrying amount of the instrument to the extent that they are not settled in the period in which they arise.

Trade and other payables, advances from related parties and other current liabilities are recognized initially at their fair values and subsequently measured at amortized cost, using effective interest method for maturities beyond one year, less settlement payments.

Dividend distributions to shareholders are recognized as financial liabilities when dividends are approved by the BOD.

Financial liabilities are classified as current liabilities if payment is due to be settled within one year or less after the reporting period (or in the normal operating cycle of the business, if longer), or the Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Otherwise, these are presented as non-current liabilities.

Financial liabilities are derecognized from the consolidated statement of financial position only when the obligations are extinguished either through discharge, cancellation or expiration.

2.9 Offsetting of Financial Instruments

Financial assets and liabilities are offset and the resulting net amount is reported in the statement of financial position when there is a legally enforceable right to set-off the recognized amounts and there is an intention to settle on a net basis, or realize the asset and settle the liability simultaneously.

2.10 Business Combination

Business acquisitions are accounted for using the acquisition method of accounting (previously called “purchase method”).

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group’s share of the net identifiable assets of the acquired subsidiary at the date of acquisition. Subsequent to initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed (see Note 2.17).

Negative goodwill which is the excess of the Group’s interest in the net fair value of net identifiable assets acquired over acquisition cost is charged directly to income.

For the purpose of impairment testing, goodwill is allocated to cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose. The cash-generating units or groups of cash-generating units are identified according to operating segment.

Gains and losses on the disposal of an interest in a subsidiary include the carrying amount of goodwill relating to it.

If the business combination is achieved in stages, the acquirer is required to remeasure its previously held equity interest in the acquiree at its acquisition-date fair value and recognize the resulting gain or loss, if any, in the consolidated profit or loss or other comprehensive income, as appropriate.

Any contingent consideration to be transferred by the Group is recognized at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognized in accordance with PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

2.11 Provisions and Contingencies

Provisions are recognized when present obligations will probably lead to an outflow of economic resources and they can be estimated reliably even if the timing or amount of the outflow may still be uncertain. A present obligation arises from the presence of a legal or constructive obligation that has resulted from past events.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the end of the reporting period, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. When time value of money is material, long-term provisions are discounted to their present values using a pretax rate that reflects market assessments and the risks specific to the obligation. Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate.

In those cases where the possible outflow of economic resource as a result of present obligations is considered improbable or remote, or the amount to be provided for cannot be measured reliably, no liability is recognized in the consolidated financial statements. Similarly, possible inflows of economic benefits to the Group that do not yet meet the recognition criteria of an asset are considered contingent assets, hence, are not recognized in the consolidated financial statements. On the other hand, any reimbursement that the Group can be virtually certain to collect from a third party with respect to the obligation is recognized as a separate asset not exceeding the amount of the related provision.

2.12 Revenue and Expense Recognition

Revenue is recognized to the extent that the revenue can be reliably measured; it is probable that future economic benefits will flow to the Group; and the costs incurred or to be incurred can be measured reliably. In addition, the following specific recognition criteria must also be met before revenue is recognized:

- (a) *Sale of residential and condominium units* – For financial reporting purposes, revenues on sales of residential and condominium units are recognized using the percentage-of-completion method. Under this method, revenue is recognized by reference to the stage of development of the properties, i.e., revenue is recognized in the period in which the work is performed. The unrealized gross profit on a year's sales is presented as Deferred Gross Profit on Current Years' Sale in the consolidated profit or loss; the uncompleted portion of gross profit in condominium and residential units sold as of the end of the year is shown as Deferred Gross Profit on Real Estate Sales (current and non-current liabilities) in the consolidated statement of financial position. Increase in completion rate during the year from Deferred Gross Profit on Real Estate Sale of prior year is recognized as income under Realized Gross Profit on Prior Year Sales. Collections, which have not met the 25% threshold before a sale is recognized, are initially recorded under the Customers' Deposits account in the consolidated statement of financial position. Revenue and cost relating to forfeited or backed-out sales are reversed in the current year as they occur. Any collections received from customers which will not be refunded are recognized as income under forfeited collections and deposits. For tax reporting purposes, the Group uses modified basis of computing its taxable income for the year based on collections from sales.

- (b) *Forfeited collections and deposits* – Revenue is recognized in the year the contract was cancelled.
- (c) *Rendering of services* – Revenue is recognized upon substantial rendition of the services required.
- (d) *Rental* – Lease income from operating lease is recognized on a straight-line basis over the lease term (see Note 2.15).
- (e) *Marketing fees* – Revenue is recognized when the performance of contractually agreed tasks has been substantially rendered.
- (f) *Tuition fees and miscellaneous fees on tuition fees* – Revenue is recognized over the corresponding school term.
- (g) *Interest* – Revenue is recognized as the interest accrues taking into account the effective yield on the asset.
- (h) *Dividends* – Revenue is recognized when the stockholders' right to receive the payment is established.

Cost of real estate property sold before completion of the development is determined based on the actual costs incurred to date plus estimated costs to complete the development of the property. The estimated expenditures for the development of sold real estate property, as determined by the Group's project engineers, are charged to the cost of residential and condominium units sold with a corresponding credit to the Reserve for Property Development account, which pertains to the remaining costs that will be incurred relative to the development/construction of the sold units.

Other costs and expenses are recognized in the consolidated statement of comprehensive income upon utilization of the service or receipt of goods or at the date they are incurred. Except for borrowing costs attributable to qualifying assets, finance costs are reported in the consolidated profit or loss (see Note 2.19).

The Group recognizes the effect of revisions in the total project cost estimates in the year in which these changes become known.

2.13 Real Estate Properties

Acquisition costs of raw land intended for future development, including other costs and expenses incurred to effect the transfer of title to the property to the Group, are charged to the Land Held for Future Development account. These costs are reclassified to the Property Development Costs account as soon as the Group starts the development of the property. Related property development costs are then accumulated in this account. Once a revenue transaction occurred, on a per project basis, up to the stage the unit is sold, the related costs are reclassified to Residential and Condominium Units for Sale. Interest on certain loans incurred during the development of the real estate properties are also capitalized as part of the Property Development Costs and Residential and Condominium units for sale account (see Note 2.19).

Costs of properties and projects accounted for as Land for Held Future Development, Property Development Costs and Residential and Condominium Units for Sale are assigned using specific identification of their individual costs. These properties and projects are valued at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs to complete and the estimated costs necessary to make the sale.

Any impairment loss from a real estate project is charged to operations in the period in which the loss is determined.

2.14 Commissions

Commissions pertain to a certain percentage of contract price given to the real estate brokers and/or agents who handle the sales and marketing of the Group's residential and high-rise projects. Commissions are recognized as expense in the period in which they are incurred.

2.15 Leases

The Group accounts for its leases as follows:

(a) Group as Lessee

Leases which do not transfer to the Group substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease payments are recognized as expense in the consolidated profit or loss on a straight-line basis over the lease term. Associated costs, such as repairs and maintenance and insurance, are expensed as incurred.

(b) Group as Lessor

Leases which the Group does not substantially transfer to the lessee all the risks and benefits of ownership of the asset are classified as operating leases. Operating lease receipts are recognized as income in the consolidated profit or loss on a straight-line basis over the lease term. Indirect costs incurred by the Group in negotiating and arranging for an operating lease is added to the carrying amount of the leased asset and recognized as expense over the lease term.

The Group determines whether an arrangement is, or contains, a lease based on the substance of the arrangement. It makes an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

2.16 Foreign Currency Transactions and Translation

The accounting records of the Group are maintained in Philippine pesos. Foreign currency transactions during the year are translated into the functional currency at exchange rates which approximate those prevailing on transaction dates.

Foreign currency gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss in the consolidated statement of comprehensive income.

2.17 Impairment of Non-financial Assets

The Group's interest in joint ventures, investment property, property and equipment, investment in associates and goodwill are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.

For purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level.

Impairment loss is recognized for the amount by which the asset or cash-generating unit's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of fair value, reflecting market conditions less costs to sell, and value in use, based on an internal evaluation of discounted cash flow evaluation. Impairment loss is charged pro-rata to the other assets in the cash generating unit.

All assets are subsequently reassessed for indications that an impairment loss previously recognized may no longer exist and the carrying amount of the asset is adjusted to the recoverable amount resulting in the reversal of the impairment loss.

2.18 Employee Benefits

(a) Defined Benefit Plan

A defined benefit plan is a post-employment plan that defines an amount of post-employment benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and salary. The legal obligation for any benefits from this kind of pension plan remains with the Group, even if plan assets for funding the defined benefit plan have been acquired. Plan assets may include assets specifically designated to a long-term benefit fund, as well as qualifying insurance policies. The Group's defined benefit post-employment plan covers all regular full-time employees. The pension plan is tax-qualified, non-contributory and administered by a trustee.

The liability recognized in the consolidated statement of financial position for a defined benefit plan is the present value of the defined benefit obligation (DBO) at the end of the reporting period less the fair value of plan assets, together with adjustments for unrecognized actuarial gains or losses and past service costs. The DBO is calculated every two years by independent actuaries using the projected unit credit method. The present value of the DBO is determined by discounting the estimated future cash outflows using a discount rate derived from the interest rates of a zero coupon government bonds as published by Philippine Dealing Exchange Corporation, that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related post-employment liability.

Actuarial gains and losses are not recognized as income or expense unless the total unrecognized gain or loss exceeds 10% of the greater of the obligation and related plan assets. The amount exceeding this 10% corridor is charged or credited to profit or loss over the employees' expected average remaining working lives. Actuarial gains and losses within the 10% corridor are disclosed separately. Past service costs are recognized immediately in the consolidated profit or loss, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past service costs are amortized on a straight-line basis over the vesting period.

(b) Compensated Absences

Compensated absences are recognized for the number of paid leave days (including holiday entitlement) remaining at the end of the reporting period. They are included in Trade and Other Payables account at the undiscounted amount that the Group expects to pay as a result of the unused entitlement.

2.19 Borrowing Costs

Borrowing costs are recognized as expenses in the period in which they are incurred, except to the extent that they are capitalized. For financial reporting purposes, interest and other costs on certain borrowings that are attributable to the acquisition, construction or development of a qualifying asset (i.e., an asset that takes a substantial period of time to get ready for its intended use or sale) are capitalized as part of Property Development Costs and Residential and Condominium Units for Sale accounts in the consolidated statement of financial position (see Note 2.13). The capitalization of borrowing costs commences when expenditures for the asset are being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use or sale are in progress. Capitalization ceases when substantially all such activities are complete.

For income tax purposes, all interest and other borrowing costs are treated as deductible expenses in the period in which they are incurred.

2.20 Income Taxes

Tax expense recognized in consolidated profit or loss comprises the sum of deferred tax and current tax not recognized in other comprehensive income or directly in equity, if any.

Current tax assets or liabilities comprise those claims from, or obligations to, fiscal authorities relating to the current or prior reporting period, that are uncollected or unpaid at the reporting period. They are calculated according to the tax rates and tax laws applicable to the fiscal periods to which they relate, based on the taxable profit for the year. All changes to current tax assets or liabilities are recognized as a component of tax expense in the consolidated profit or loss.

Deferred tax is accounted for using the liability method, on temporary differences at the end of the reporting period between the tax base of assets and liabilities and their carrying amounts for financial reporting purposes. Under the liability method, with certain exceptions, deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences and the carryforward of unused tax losses and unused tax credits to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized. Unrecognized deferred tax assets are reassessed at the end of each reporting period and are recognized to the extent that it has become probable that future taxable profit will be available to allow such deferred tax assets to be recovered.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled provided such tax rates and tax laws have been enacted or substantively enacted at the end of the reporting period.

Most changes in deferred tax assets or liabilities are recognized as a component of tax expense in the consolidated profit or loss. Only changes in deferred tax assets or liabilities that relate to items recognized in other comprehensive income or directly to equity are recognized in other comprehensive income or directly to equity, respectively.

Deferred tax assets and deferred tax liabilities are offset if the Group has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred taxes relate to the same entity and the same taxation authority.

2.21 Related Party Relationships and Transactions

Related party transactions are transfers of resources, services or obligations between the Group and its related parties, regardless whether a price is charged.

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial and operating decisions. These parties include: (a) individuals owning, directly or indirectly through one or more intermediaries, control or are controlled by, or under common control with the Group; (b) associate; and, (c) individuals owning, directly or indirectly, an interest in the voting power of the Group that gives them significant influence over the Group and close members of the family of any such individual.

In considering each possible related party relationship, attention is directed to the substance of the relationship and not merely on the legal form.

2.22 Earnings Per Share

Basic earnings per share (EPS) is computed by dividing net profit attributable to equity holders of the parent company by the weighted average number of shares issued and outstanding, adjusted retroactively for any stock dividend, stock split or reverse stock split declared during the current period.

Diluted EPS is computed by adjusting the weighted average number of ordinary shares outstanding to assume conversion of dilutive potential shares. Currently, the Group does not have dilutive potential shares outstanding, hence, the diluted earnings per share is equal to the basic earnings per share.

2.23 Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the Group's chief operating decision-maker who is responsible for allocating resources and assessing performance of the operating segments.

In identifying its operating segments, management generally follows the Group's service lines as disclosed in Note 4, which represent the main products and services provided by the Group.

Each of these operating segments is managed separately as each of these service lines requires different resources as well as marketing approaches. All inter-segment transfers are carried out at arm's length prices.

The measurement policies the Group uses for segment reporting under PFRS 8, *Operating Segments*, is the same as those used in its financial statements, except that the following are not included in arriving at the operating profit of the operating segments:

- post-employment benefit expenses
- research costs, if any, relating to new business activities
- revenue and costs from investment property

There have been no changes from prior periods in the measurement methods used to determine reported segment profit or loss.

2.24 Equity

Capital stock represents the nominal value of shares that have been issued.

Additional paid-in capital includes any premiums received on the initial issuing of capital stock. Any transaction costs associated with the issuing of shares are deducted from additional paid-in capital, net of any related income tax benefits.

Treasury stock are stated at the cost of reacquiring such shares and are deducted from equity attributable to the Company's equity holders until the shares are cancelled, reissued or disposed of.

Revaluation reserves comprise the accumulated net gains and losses due to the revaluation of AFS financial assets.

Retained earnings include all current and prior period results of operations as reported in profit or loss in the consolidated statement of comprehensive income.

2.25 Events After the End of the Reporting Period

Any post-year-end event that provides additional information about the Group's consolidated financial position at the end of the reporting period (adjusting event) is reflected in the consolidated financial statements. Post-year-end events that are not adjusting events, if any, are disclosed when material to the consolidated financial statements.

3. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The consolidated financial statements of the Group prepared in accordance with PFRS require management to make judgments and estimates that affect amounts reported in the consolidated financial statements and related notes. Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may ultimately vary from these estimates.

3.1 Critical Judgments in Applying Accounting Policies

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimation, which have the most significant effect on the amounts recognized in the consolidated financial statements:

(a) Impairment of AFS Financial Assets

The Group follows the guidance of PAS 39 in determining when an investment is other-than-temporarily impaired. This determination requires significant judgment. In making this judgment, the Group evaluates, among other factors, the duration and extent to which the fair value of an investment is less than its cost; and the financial health of and near-term business outlook for the investee, including factors such as industry and sector performance and operational and financing cash flow.

The Group's AFS is not impaired as of December 31, 2012, 2011, and 2010.

(b) Distinction Between Investment Properties and Owner-managed Properties

The Group determines whether a property qualifies as investment property. In making its judgment, the Group considers whether the property generates cash flows largely independently of the other assets held by an entity. Owner-occupied properties generate cash flows that are attributable not only to property but also to other assets used in the Group's main line of business.

Some properties comprise a portion that is held to earn rental or for capital appreciation and another portion that is held for use in the Group's main line of business or for administrative purposes. If these portions can be sold separately (or leased out separately under finance lease), the Group accounts for the portions separately. If the portions cannot be sold separately, the property is accounted for as investment property only if an insignificant portion is held for use in the Group's main line of business or for administrative purposes. Judgment is applied in determining whether ancillary services are so significant that a property does not qualify as investment property. The Group considers each property separately in making its judgment.

Based on management's assessment, properties held for rental and for capital appreciation are classified as investment property.

(c) Distinction between Operating and Finance Lease

The Group has entered into various lease agreements as either a lessor or lessee. Critical judgment was exercised by management to distinguish each lease agreement as either an operating or finance lease by looking at the transfer or retention of significant risk and rewards of ownership of the properties covered by the agreements.

Based on management's assessment, the Group's lease agreements as a lessor and lessee are classified as operating lease.

(d) Recognition of Provisions and Contingencies

Judgment is exercised by management to distinguish between provisions and contingencies. Policies on recognition and disclosures of provisions and contingencies are discussed in Note 2.11 and relevant disclosures are presented in Note 25.

3.2 Key Sources of Estimation Uncertainty

The estimates and assumptions used in the consolidated financial statements are based upon management's evaluation of relevant facts and circumstances of the Group's consolidated financial statements. Actual results could differ from those estimates. The following are the relevant estimates performed by management.

(a) Determining Net Realizable Value of Residential and Condominium Units for Sale, Property Development Costs and Land Held for Future Development

In determining the net realizable value of residential and condominium units for sale, property development costs and land held for future development, management takes into account the most reliable evidence available at the times the estimates are made. The future realization of the carrying amounts of these assets are affected by price changes in the different market segments as well as the trends in the real estate industry. These are considered key sources of estimation and uncertainty and may cause significant adjustments to the Group's Residential and Condominium Units for Sale, Property Development Costs and Land Held for Future Development within the next financial year.

Considering the Group's pricing policy, the net realizable values of real estate, residential and condominium units for sale, property development costs and land held for future development are higher than their related carrying values as of the end of the reporting periods.

(b) Estimating Useful Lives of Property and Equipment and Investment Property

The Group estimates the useful lives of property and equipment and investment property based on the period over which the assets are expected to be available for use. The estimated useful lives of property and equipment and investment property are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. The carrying amounts of investment property and property and equipment are analyzed in Notes 12 and 13, respectively. Actual results, however, may vary due to changes in estimates brought about by changes in factors mentioned above. There is no change in estimated useful lives of property and equipment and investment property in 2012 and 2011 based on management's assessment.

(c) Impairment of Trade and Other Receivables and Advances to Landowners and Joint Ventures

Adequate amount of allowance for impairment is provided for specific and groups of accounts, where objective evidence of impairment exists. The Group evaluates the amount of allowance for impairment based on available facts and circumstances affecting the collectibility of the accounts, including, but not limited to, the length of the Group's relationship with the customers, the customers' current credit status, average age of accounts, collection experience and historical loss experience.

Allowance for impairment recognized on Trade and Other Receivables as of December 31, 2012 and 2011 amounted to P0.5 million and P0.6 million, respectively (see Note 6). Impairment losses on trade and other receivables, as also shown in Note 6, amounted to P0.02 million in 2012 and P0.2 million in 2011 and in 2010. No impairment losses were recognized on the Group's Advances to Landowners and Joint Ventures (see Note 8).

(d) Valuation of FVTPL and AFS

The Group carries certain financial assets at fair value, which are classified as level 1 fair values as these investments are traded in the stock market. As such, no significant accounting estimates and judgment was made on its FVTPL and AFS (see Note 11). Meanwhile, AFS amounting to P2.7 million as of December 31, 2012 and 2011 are measured at cost since there are no available market values on these instruments.

(e) Realizable Amount of Deferred Tax Assets

The Group reviews its deferred tax assets at the end of each reporting period and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

The carrying value of the Group's deferred tax assets as of December 31, 2012 and 2011 is disclosed in Note 21.

(f) Impairment of Non-financial Assets

The Group's policy on estimating the impairment of non-financial assets is discussed in detail in Note 2.17. Though management believes that the assumptions used in the estimation of fair values reflected in the consolidated financial statements are appropriate and reasonable, significant changes in these assumptions may materially affect the assessment of recoverable values and any resulting impairment loss could have a material adverse effect on the results of operations.

Based on management evaluation, no impairment losses were recognized on goodwill, interest in joint ventures, investment in associates, investment property and property and equipment in 2012, 2011 and 2010 (see Notes 1, 8, 10, 12 and 13).

(g) Valuation of Post-Employment Defined Benefit

The determination of the Group's obligation and cost of pension is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions are described in Note 20.2 and include, among others, discount rates, expected rate of return, salary increase rate and employee turnover rate. In accordance with PFRS, actual results that differ from the assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded obligation in such future periods.

The Group's retirement obligation as of December 31, 2012 and 2011 is disclosed in Note 20.2.

(h) Revenue Recognition Based on Percentage-of-Completion Method

The Group uses the percentage-of-completion method in accounting for its realized gross profit on real estate sales. Use of the percentage-of-completion method requires the Group to estimate the portion completed to date as a proportion of the total budgeted cost of the project. Should the proportion of the percentage of completed projects differed by 10% from management's estimates, the amount of revenue recognized in 2012 and 2011 would have increased by P33.76 million and P39.51 million, respectively, if percentages of completion were increased by 10%. Consequently, revenue would have decreased by P47.45 and P40.59 million in 2012 and 2011, respectively, if the percentages of completion were decreased by 10%.

(i) Basis for Revenue Recognition Benchmark

As discussed in Note 2.12(a), the Group recognizes its revenue in full when 25% or more of the total contract price is received. Management believes that the revenue recognition criterion on percentage of collection is appropriate based on the Group's collection history of customers and number of back out sales in prior years. Buyer's interest in the property is considered to have vested when the payment of at least 25% of the contract price has been received from the buyer and the Group ascertained the buyer's commitment to complete the payment of the total contract price.

(j) Determination of Fair Value of Investment Property

Investment property is measured using the cost model. The fair value disclosed in Note 12 to the consolidated financial statements is determined by the Group using the discounted cash flows valuation technique since the information on current or recent prices of investment property is not available. The Group uses assumptions that are mainly based on market conditions existing at the end of each reporting period.

The principal assumptions underlying management's estimation of fair value are those related to: the receipt of contractual rentals; expected future market rentals; void periods; maintenance requirements; and appropriate discount rates. These valuations are regularly compared to actual market yield data and actual transactions by the Group and those reported by the market.

The expected future market rentals are determined on the basis of current market rentals for similar properties in the same location and condition.

4. SEGMENT REPORTING

4.1 Business Segments

The Group's operating businesses are organized and managed separately according to the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The Group is engaged in the development and marketing of mid-cost housing projects in the form of condominium communities, subdivision lots and house and lot packages, and commercial units to a limited extent. It classifies and monitors its projects into high-rise and horizontal. High-rise projects refer to condominiums and other medium scale properties while the horizontal projects refer to house and lot packages and subdivision lots. Both are intended for middle income market.

4.2 Segment Assets and Liabilities

Segment assets include all operating assets used by a segment and consist principally of operating receivables, property development cost, residential and condominium units for sale and investment property. Segment liabilities include all operating liabilities incurred by management in each particular segment.

4.3 Intersegment Transactions

There are no intersegment transactions. In case of inter-segment sales and transfers, the Group generally accounts for them as if the sales or transfers were made to third parties at current market prices.

4.4 Analysis of Segment Information

The tables below and in the succeeding pages present the revenue and profit information regarding industry segments for the years ended December 31, 2012, 2011 and 2010 and certain assets and liabilities information regarding industry segments as of December 31, 2012, 2011 and 2010.

5. CASH AND CASH EQUIVALENTS

Cash and cash equivalents include the following components as of December 31:

	<u>2012</u>	<u>2011</u>
Cash on hand and in banks	P 296,890,366	P 255,843,252
Short-term placements	<u>2,736,332,616</u>	<u>571,823,069</u>
	<u>P 3,033,222,982</u>	<u>P 827,666,321</u>

Cash in banks generally earn interest at rates based on daily bank deposit rates.

Peso-denominated short-term placements are made for varying periods of up to 91 days in 2012 and 60 days in 2011 and earn annual effective interest ranging from 0.50% to 4.25% in 2012, 0.50% to 4.75% in 2011 and 0.25% to 4.25% in 2010. Dollar-denominated short-term placements are made for varying periods of up to 93 days in 2012, 98 days in 2011 and 90 days in 2010 and earn annual effective interest ranging from 0.25% to 1.50% in 2012, 0.88% to 2.50% in 2011 and 0.25 % to 2.0% in 2010 (see Note 19.1).

6. TRADE AND OTHER RECEIVABLES

	<u>P 4,784,947,748</u>	<u>P 4,061,794,841</u>

Trade receivables of the Group are either interest-bearing or noninterest-bearing. The installment period of interest-bearing sales contracts ranges from 1 to 15 years. Interest-bearing receivables bear nominal interest rates, which are equal to the effective interest rates ranging from 14% to 18% in 2012, 2011 and 2010. The related finance income earned on those sales contracts amounting to P319.2 million in 2012, P216.3 million in 2011 and P359.3 million in 2010 are reported as part of finance income in the consolidated statements of comprehensive income (see Note 19.1).

The installment period of noninterest-bearing sales contracts ranges from 3 to 5 years. The fair values of the noninterest-bearing trade receivables as of December 31, 2012 and 2011 were determined by calculating the present value of the cash flows anticipated to be received until the end of the instalment term using 10% interest in 2012, 2011 and 2010. Amortization of day one loss are presented as part of the Finance Income amounting to P34.3 million in 2012, P37.2 million in 2011 and P52.0 million in 2010 (see Note 19.1).

The Group does not identify specific concentrations of credit risk with regard to trade and other receivables, as the amounts recognized resemble a large number of receivables from various customers. In addition, certain accounts receivable from trade customers are covered by post-dated checks. The Group also retains the titles to the property until the trade receivables are fully collected. Repossessed properties are offered for sale to other customers.

The Group partially finances its real estate projects and other business undertakings through discounting of its trade receivables on a with-recourse basis with certain local banks. The discounted trade receivables amounted to P333.0 million and P525.0 million as of December 31, 2012 and 2011, respectively, and the related liability is presented as part of Bank Loans under Interest-bearing Loans and Borrowings in the statements of financial position (see Note 14.1).

Advances to suppliers and contractors pertain to downpayments made by the Group to the suppliers and contractors based on a certain percentage of the contract price, construction materials purchased by Group that are used by the contractors, and utility consumption that are chargeable to contractors. The initial payment will eventually be recouped or deducted from the amount payable of the Group either in a pro-rated basis or in full once billed by the suppliers and contractors.

Refundable security deposits include various deposits to third parties for electrical and other utilities equipment needed in the development of housing projects, i.e., condominium communities and house and lot packages. Such deposits are only refundable upon completion of the projects or upon return of the equipment used. However, the exact date or period of completion of projects or return of equipment is indeterminable. Accordingly, refundable deposits are accounted for at cost.

In 2012, the Group reclassified other receivables amounting to P68.2 million to non-current portion based on management evaluation that settlement will be made within two years.

The Group's trade and other receivables have been reviewed for indicators of impairment. Certain trade receivables were found to be impaired and losses have been recorded accordingly.

A reconciliation of the allowance for impairment on current and non-current trade and other receivables at the beginning and end of 2012 and 2011 is shown below.

7. REAL ESTATE PROPERTIES

7.1 *Property Development Costs*

This account pertains to accumulated costs incurred on projects which are not yet offered for sale as of the end of the reporting periods.

7.2 *Residential and Condominium Units for Sale*

This account represents the accumulated costs incurred, net of recognized cost of real estate sales in the consolidated statements of comprehensive income, on house and lots and condominium units available for sale. The subdivision houses include houses that are ready for occupancy, house models and units under construction.

Total capitalized borrowing cost during the year amounted to P43.8 million and P73.4 million in 2012 and 2011, respectively (see Note 14.3).

7.3 *Net Realizable Value*

Management believes that the net carrying amounts of these assets are lower than their net realizable values considering present market rates; thus, no valuation allowance has been provided in the consolidated financial statements.

8. ADVANCES TO LANDOWNERS AND JOINT VENTURES

The cash advances made by the Group relate to a number of joint venture agreements entered into with landowners covering the development of certain parcels of land. The joint venture agreements stipulate that the Group's joint venturer shall contribute parcels of land and the Group shall be responsible for the planning, conceptualization, design, demolition of existing improvements, construction, financing and marketing of condominium units to be constructed on the properties. Costs incurred by the Group for these projects are recorded under the Residential and Condominium Units for Sale and Property Development Cost accounts in the consolidated statements of financial position. In addition to providing specified portion of the total project development costs, the Group also commits to advance mutually agreed-upon amounts to the landowners which would then be used for purposes such as reconsolidation/separation/subdivision of mother titles and relocation of existing occupants. Repayments of these advances may be made upon completion of the project development either in the form of residential, condominium or commercial units and saleable lots corresponding to the landowners' share in saleable lots or in the form of cash to be derived from the sales of the landowner's share in the saleable lots and residential and condominium units.

The details of advances to landowners and joint ventures are as follows:

	<u>2012</u>	<u>2011</u>
Advances to landowners:		
Balance at beginning of year	P 118,184,386	P 422,685,499

Balance at end of year	<u>797,584,764</u>	<u>822,031,807</u>
	<u>P 822,584,793</u>	<u>P 940,216,193</u>

In 2012, certain downpayments made on parcel of land, amounting to P130.0 million and P122.9 million, were reclassified to Land Held for Future Development and Property Development Costs account, respectively, upon full payment and issuance of title.

In 2011, certain advances to landowners were settled through conveyance of a parcel of land. The parcel of land, valued at P170.0 million, is presented as part of Land Held for Future Development account.

The Group commits to develop the properties based on the terms agreed with joint venture partners. Total commitment for cash advances under the existing joint venture agreements amounted to P300.0 million in 2011 (nil in 2012). This commitment has been fully granted by the Group as of December 31, 2012 and 2011.

The net commitment for construction expenditures amounts to:

	<u>2012</u>	<u>2011</u>
Total commitment for construction expenditures	P 7,465,887,664	P 8,138,637,602
Total expenditures incurred	(1,934,085,679)	(1,071,859,254)
Net commitment	<u>P 5,531,801,985</u>	<u>P 7,066,778,348</u>

The Group's interests in jointly controlled operations and projects ranges from 55% to 82% and 55% to 78% in 2012 and 2011, respectively. The Group's jointly controlled projects are as follows:

- Pioneer Woodlands
- San Lorenzo Place
- Various Metro Manila and Calabarzon projects

As of December 31, 2012 and 2011, the Group has no other contingent liabilities with regard to these joint ventures or the probability of loss that may arise from contingent liabilities is remote.

9. LAND HELD FOR FUTURE DEVELOPMENT

This account includes cost of several parcels of land acquired by the Group and other costs incurred to effect the transfer of the title of the properties to the Group. Most of these properties are located in Metro Manila and Calabarzon areas and are intended for future development. Real estate taxes paid during these years relating to these properties amounted to P4.8 million, P1.0 million and P1.0 million in 2012, 2011 and 2010, respectively, and is presented as part of Taxes and Licenses in the consolidated statements of comprehensive income. Management believes that the net realizable value of land held for future development is higher than its related carrying value as of the end of the reporting periods.

On December 26, 2012, GPMAI issued additional 5,000,000 shares of stock at P1 par value which was purchased by a third party. As a result, after the issuance, the percentage of ownership of the Company over GPMAI was diluted from 52% to 47%, thereby losing control over the latter. The fair value from the remeasurement of the Company's investment in GPMAI amounting to P294.0 million was recognized as the deemed cost of the new investment in associates. The related balances of GPMAI's assets and liabilities as of December 26, 2012 were deconsolidated in 2012 and were no longer in the consolidated statement of financial position as of December 31, 2012. Accordingly, loss from dilution amounting to P37.5 million was recognized in the 2012 consolidated statement of comprehensive income.

On March 25, 2011, the percentage ownership of the Company over SPI was diluted and reduced from 80% to 33% due to Megaworld's subscription to SPI's unissued capital stock. As a result, SPI became a subsidiary of Megaworld holding approximately 59% ownership in SPI. The fair value of the reduced ownership interest of the Company in SPI amounting to P371.2 million was recognized as the deemed cost of the investment in associate. Accordingly, a loss from dilution was recognized and this was presented as Loss from Dilution of Investment in Subsidiary in the 2011 consolidated statement of comprehensive income. Also, the related balances of SPI's assets and liabilities as of December 31, 2010 were deconsolidated in 2011 and were no longer included in the consolidated statement of financial position as of December 31, 2011.

A portion of the Company's advances to SPI amounting to P204.8 million is presented as part of net investment since settlement of the advances is neither planned nor likely in the foreseeable future.

Equity share in net earnings of associates amounted to P83.8 million in 2012 and P16.5 million in 2011 and are presented in the consolidated statements of comprehensive income. No dividends were received from the investments in 2012.

10.2 Summarized Financial Information

The aggregated amounts of assets, liabilities and net profit (loss) of the associates are as follows:

	<u>Assets</u>	<u>Liabilities</u>	<u>Revenues</u>	<u>Net Profit (Loss)</u>
2012:				
SPI	P 7,355,569,029	P 5,925,688,531	P 896,244,643	P 242,487,133

As of December 31, 2012 and 2011, the related book values of the Group holding in these associates amounting to P758.6 million and P459.4 million, respectively, are higher than or equal to the related carrying amount, hence, the Group deemed that no impairment loss is necessary.

11. AVAILABLE-FOR-SALE FINANCIAL ASSETS

The movements of the carrying amounts of AFS financial assets are as follows:

	<u>Note</u>	<u>2012</u>	<u>2011</u>
Balance at beginning of year		P 1,652,746,082	P 2,065,221,390

Balance at end of year		<u>P 1,887,176,000</u>	<u>P 1,652,746,082</u>

AFS financial assets mainly consist of investments made by EPHI in 2012 and 2011 and GPMAI in 2011 in equity securities of companies listed in the PSE. The fair value of these securities has been determined directly by reference to published prices in an active market.

The fair value of the Group's AFS financial assets mainly consist of investment in shares, which are quoted prices (unadjusted) in active markets for identical assets or liabilities. The fair values of these AFS financial assets are categorized as Level 1 amounting to P1.9 billion. On the other hand, the Group's Level 3 investments amounting to P2.7 million include equity instruments which are presented under Other non-current assets.

The net accumulated fair value gains or losses in AFS financial assets is shown as Revaluation Reserves in the equity section of the consolidated statements of financial position.

Dividends earned amounted to P40.5 million, P44.4 million and P10.7 million in 2012, 2011 and 2010 and are presented as Dividend Income under Other income in the consolidated statements of comprehensive income (see Note 18.1).

12. INVESTMENT PROPERTY

The Group's investment property pertains to building and office/commercial units for lease and a parcel of land held for capital appreciation. Rental revenues recognized for the years ended December 31, 2012, 2011 and 2010 amounted to P45.0 million, P47.6 million and P46.4 million, respectively, and are presented as Rental Income account in the consolidated statements of comprehensive income. Real estate taxes and depreciation substantially represent the direct costs in leasing these properties. Real estate tax amounting to P1.6 million, P1.0 million and P1.0 million was recognized as a related expense in 2012, 2011 and 2010, respectively, and presented as part of Taxes and Licenses in the consolidated statements of comprehensive income.

The gross carrying amounts and accumulated depreciation of investment property as of the reporting period is shown below.

	<u>Note</u>	<u>2012</u>	<u>2011</u>
Cost		P 351,596,080	P 351,596,080

The movements to the carrying amount of investment property as of December 31, 2012 and 2011 are as follows:

	<u>Note</u>	<u>2012</u>	<u>2011</u>
Balance at January 1, net of accumulated depreciation		P 233,621,784	P 250,426,606

Balance at December 31, net of accumulated depreciation		<u>P 202,357,339</u>	<u>P 233,621,784</u>

The amount of depreciation expense is presented as part of Depreciation account in the statements of comprehensive income.

Based on management's assessment, the fair values of the investment property amounted to P521.6 million and P535.0 million as of December 31, 2012 and 2011, respectively. The fair values were determined based on certain appraised reports and using the income approach of the discounted cash flow method for certain properties.

The principal assumptions underlying management's estimation of fair value are those related to the receipt of contractual rentals, expected future market rentals, maintenance requirements, and appropriate discount rates. These valuations are regularly compared to actual market yield data and actual transactions by the Group and those reported by the market.

The expected future market rentals are determined on the basis of current market rentals for similar properties in the same location and condition.

13. PROPERTY AND EQUIPMENT

As of December 31, 2012 and 2011, this account includes land costing P81,095,000 which is used as LBASI's school site. The gross carrying amounts and accumulated depreciation and amortization of property and equipment, except land, at the beginning and end of 2012 and 2011 are shown below.

	Building and Other Improvements	Office Furniture and Equipment	Transportation Equipment	Leasehold Improvements	Total

The amount of depreciation expense is presented as part of Depreciation account in the consolidated statements of comprehensive income.

The cost of fully depreciated assets still used in business amounted to P136.9 million and P127.5 million as of December 31, 2012 and 2011, respectively.

14. INTEREST-BEARING LOANS AND BORROWINGS

At December 31, 2012 and 2011, the interest-bearing loans and borrowings are as follows:

	<u>Notes</u>	<u>2012</u>	<u>2011</u>
Current:			
Bank loans	6	P 95,846,754	P 164,727,699
Commercial/term loan	22.3	<u>57,142,857</u>	<u>57,142,857</u>
		<u>152,989,611</u>	<u>221,870,556</u>
Non-current:			
Bank loans	6	236,893,851	360,234,266
Commercial/term loans	22.3	<u>-</u>	<u>57,142,857</u>
		<u>236,893,851</u>	<u>417,377,123</u>
Total		<u>P 389,883,462</u>	<u>P 639,247,679</u>

Certain properties presented as part of Residential and condominium units for sale and Trade receivables with total estimated carrying value of P861.1 million and P1.6 billion as of December 31, 2012 and 2011, respectively, are used as collateral for the P389.9 million and P639.2 million loan as of December 31, 2012 and 2011, respectively.

14.1 Bank Loans

The bank loans represent secured and unsecured loans from banks. The loans bear annual interest rates ranging from 7.8% to 10.5% for 2012 and 7.9% to 10.5% 2011.

Bank loans also include amounts covered by trade receivables discounted on a with-recourse basis (see Note 6). Finance costs that are directly attributable to construction of the Group projects are capitalized as part of Residential and Condominium Units for Sale (see Note 14.3).

Certain bank loans require the Group to maintain a debt-to-equity ratio of not more than 1:1 and a current ratio of not less than 2:1.

As of December 31, 2012 and 2011, the Group is in compliance with the above ratios.

14.2 Commercial/Term Loans

Included in the balance of commercial/term loans is the P400.0 million loan obtained in 2006 from a government institution. This loan bears annual interest of 10.5% and is secured by certain real estate properties owned by a shareholder (see Note 22.3). The principal amount is payable in seven equal annual amortization beginning March 15, 2007. Interest payments are due and payable semi-annually, with the first interest payment due on September 15, 2006 and every six months thereafter.

14.3 Interest

Total interest on these interest-bearing loans and borrowings in 2012, 2011 and 2010 amounted to P43.8 million, P76.1 million and P145.2 million, respectively. Interest charges that are directly attributable to the construction of the Group's projects are capitalized as part of Residential and Condominium Units for Sale accounts in the consolidated statements of financial position (see Note 7.2). In 2012, 2011 and 2010, the capitalized interest expense amounted to P43.8 million, P73.4 million and P127.9 million, respectively.

15. TRADE AND OTHER PAYABLES

This account consists of:

	<u>2012</u>		<u>2011</u>
Trade payables	P 831,093,216	P	221,950,195
Taxes payable	57,126,387		39,456,230
Accrued expenses	29,631,551		8,378,859
Commissions	15,759,017		17,759,017
Interest payable	14,295,782		25,026,167
Miscellaneous	535,550		8,649,346
	<u>P 948,441,503</u>	P	<u>321,219,814</u>

Accrued expenses include the Group's obligations to its suppliers that are expected to be settled within 12 months from the end of the reporting period. These liabilities arise mainly from accrual of construction expenses incurred during the year.

16. CUSTOMERS' DEPOSITS

Presented below are the details of this account.

	<u>2012</u>	<u>2011</u>
Advances from customers	P 2,564,084,173	P 2,200,826,677
Other deposits	<u>175,458,235</u>	<u>145,003,185</u>
	<u>P 2,739,542,408</u>	<u>P 2,345,829,862</u>

Advances from customers represent cash received from customers for the real estate properties purchases that did not reach 25% of the contract price. The total receivables from buyers are then reduced by these advances once the sales are recognized by the Group. Other deposits mainly include cash received from customers for miscellaneous fees to process the transfer of title to customers and other related expenses.

17. OTHER CURRENT LIABILITIES

As of December 31 other current liabilities include the following:

	<u>2012</u>	<u>2011</u>
Retention payable	P 148,622,977	P 101,063,759
Refundable tenant rental deposits	28,954,786	27,884,822
Deferred income	17,026,195	17,237,250
Miscellaneous	<u>2,667,324</u>	<u>2,437,799</u>
	<u>P 197,271,282</u>	<u>P 148,623,630</u>

Retention payable pertains to amount withheld from payments made to contractors to ensure compliance and completion of contracted projects equivalent to 10% of every billing made by the contractor. Payment to contractors shall be based on final acceptance of all works.

Deferred income refers to unearned tuition, miscellaneous and other fees relating to the portion of the school year applicable to the succeeding financial year.

18. OTHER INCOME AND OTHER OPERATING EXPENSES

18.1 Other Income

The details of this account are shown below.

20.2 Retirement Benefit Obligation

The Group maintains a tax-qualified, partially funded, non-contributing post-employment plan covering all regular full time employees. Actuarial valuations are made every two years to update the retirement benefit costs. The latest actuarial report was dated January 25, 2012.

The amounts of the Group's retirement benefit obligation recognized in the consolidated statements of financial position are determined as follows:

	<u>2012</u>	<u>2011</u>
Present value of the obligation	P 158,756,209	P 129,080,054
Fair value of the assets	(8,453,807)	(5,097,127)

For the determination of the Group's retirement benefit obligation, the following actuarial assumptions were used:

	<u>2012</u>	<u>2011</u>	<u>2010</u>
<i>Parent company</i>			
Discount rates	6.44%	6.29%	9.28%
Expected rate of salary increases	8.00%	8.00%	8.00%

Expected rate of salary increases	5.00%	10.00%	10.00%

For other subsidiaries, as their accounting and other administrative functions are being handled by the parent company, recognition of cost of retirement benefits is not necessary.

Assumptions regarding future mortality are based on published statistics and mortality tables. The average remaining working life of an individual for both males and females are as follows:

	<u>Retirement Age</u>	<u>Average Remaining Working life</u>
Parent	60	28
LBASI	60	24
EPHI	65	21

Valuation results are based on the employee data as of the valuation date as provided by the Group. The discount rate assumption (gross of tax) is based on the Philippine Dealing and Exchange Corporation rates as of the valuation date considering the average year of remaining working life of the employees.

21. TAXES

The components of tax expense reported in profit or loss in the consolidated statements of comprehensive income are as follows:

	<u>2012</u>	<u>2011</u>	<u>2010</u>

These advances to/from stockholders, associates and other related parties are generally unsecured. Some of these are interest-bearing. The amounts are generally collectible/payable in cash on demand or through offsetting arrangements with the related parties; hence, their carrying values are considered to be a reasonable approximation of their fair values.

Certain advances to and from related parties were discounted to present values. Amortization of interest is presented as part of finance income in the consolidated statements of comprehensive income (see Note 19.1).

22.2 Marketing Fee

The Group earns marketing fee from the sale of Megaworld's real estate properties and in selling landowners shares in joint venture projects. The marketing fee recognized amounted to P149.6 million, P149.8 million and P110.0 million in 2012, 2011 and 2010, respectively, which is shown as part of Commission in the consolidated statements of comprehensive income. The related receivables arising from marketing fees are presented as part of Advances to Related Parties in the consolidated statements of financial position (see Note 22.1).

22.3 Commercial/Term Loan

The Company has an outstanding commercial/term loan from a government institution bearing an annual interest rate of 10.5%. This loan is secured by certain real estate properties owned by a stockholder (see Note 14.2).

22.4 Deed of Assignment

In June 2011, Fil-Estate Properties, Inc. (FEPI), a related party under common ownership, has agreed to assign to the Company the right to develop a certain property. In consideration of the assignment, the Company shall pay FEPI a non-refundable cash consideration totaling P60.0 million. The non-refundable cash consideration is shown as part of Property Development Cost in the 2011 consolidated statement of financial position. As of December 31, 2012, the Company has paid FEPI for a cash consideration of P31.88 million to FEPI while the unpaid portion of P28.12 million is presented under Advances from Related Parties account.

On April 24, 2012, the Company's BOD approved the offer for subscription of 2,695,239,833 new shares (the "right shares") by way of a pre-emptive offer (the "rights offer") to holders of its common shares at the proportion of one new share for every four existing common shares, at the offer/exercise price equivalent to their par value of P1 per share. This was approved by SEC on August 30, 2012.

Also, on April 24, 2012, the BOD approved the increase in the Company's authorized capital stock from P23.5 billion divided into 21.5 billion common and 2 billion preferred shares both with par value of P1 each, to P33.5 billion divided into 31.5 billion common and 2 billion preferred shares both with par value of P1 per share. The application for the increase in authorized capital stock was approved by the SEC on October 17, 2012.

The Series B preferred shares are nonredeemable, convertible into common shares and are nonvoting. The shares have zero coupon rate and shall not be entitled to dividends. The Series B preferred shares shall be convertible to common shares anytime after the end of the 18 months from the implementation date, May 29, 1998, as defined in the subscription agreements. On August 31, 2012, the Company converted all the issued preferred shares into common shares amounting to P285.7 million.

On April 24, 1996, the Company obtained approval for the listing of its common stock on the PSE; thereafter, the shares were offered for the sale to the public. The initial public offering consists of 214,666,667 new common shares and the sale by a stockholder of the Company of 210,333,333 existing common shares at an offer price of P12.90 per share.

On August 8, 2007, the Company's BOD approved the prerogative rights offer of one share for every three existing common shares. On August 22, 2007, the majority of the BOD approved the increase in the Company's authorized capital stock from P13.0 billion (divided into 11 billion common and 2 billion preferred shares both with par value of P1.00 each) to P23.5 billion (divided into 21.5 billion common and 2 billion preferred shares both with par value of P1.00).

As of December 31, 2012 and 2011, the Company's number of shares issued and outstanding totaled 13,476,199,167 and 10,495,236,253, respectively, with total Treasury Stock of 127,256,071 for both years in which 13,603,455,238 and 10,622,492,324, as of December 31, 2012 and 2011, respectively, were listed and closed at a price of P0.99 and P0.59 (as of December 28, 2012 and December 31, 2011, respectively) per share. The Company has 13,125 and 13,460 holders of equity securities listed in PSE as of December 31, 2012 and 2011, respectively.

Leases have terms ranging from one to four years, with renewal options and include annual escalation rate of 2% to 10%. The future minimum rentals payable under these non-cancellable operating leases as of December 31 are as follows:

	<u>2012</u>	<u>2011</u>	<u>2010</u>
Within one year	P 36,893,558	P 37,253,043	P 11,789,202
After one year but not more than five years	<u>23,383,968</u>	<u>30,756,435</u>	<u>12,443,878</u>
	<u>P 60,277,526</u>	<u>P 68,009,478</u>	<u>P 24,233,080</u>

Total rentals from these operating leases which was charged to Rentals under Other Operating Expenses amounted to P137.4 million, P64.3 million and P48.4 million in 2012, 2011 and 2010, respectively (see Note 18.2).

25.3 Legal Claims

As of December 31, 2012, the Group is a party to a litigation arising in the normal course of business. No provision for contingency was recognized in the consolidated financial statements because the ultimate outcome of this litigation cannot presently be determined. In addition, the Group's management believes that the impact of which to the consolidated financial statements, taken as a whole, is not material.

25.4 Credit Lines

As of December 31, 2012, 2011 and 2010, the Group has unused lines of credit amounting to P670.0 million, P168.0 million and P170.0 million, respectively.

25.5 Capital Commitments

The Group has capital commitments for the unutilized balance of its stock rights offering amounting to P2.7 billion as of December 31, 2012 for the landbanking, project development and general corporate purposes.

25.6 Others

There are other commitments, guarantees and contingent liabilities that may arise in the normal course of operations of the Group which are not reflected in the consolidated financial statements. The management of the Group is of the opinion that losses, if any, from these items will not have any material effect on its consolidated financial statements.

26. RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group is exposed to a variety of financial risks which result from both its operating and investing activities. Risk management is carried out by a central treasury department under policies approved by the BOD, and focuses on actively securing the Group's short to medium-term cash flows by minimizing the exposure to financial markets. Long-term financial investments are managed to generate lasting returns.

The Group does not engage in the trading of financial assets for speculative purposes nor does it write options. The most significant financial risks to which the Group is exposed to are described below and in the next pages.

26.1 Foreign Currency Risk

Most of the Group's transactions are carried out in Philippine pesos, its functional currency. Foreign exchange risk arises from the Group's United States (U.S.) dollar-denominated cash and cash equivalents (see Note 5).

The Group's U.S. dollar-denominated financial assets, translated into Philippine pesos at the closing rate, amounted to P77.1 million, P90.3 million and P111.5 million as of December 31, 2012, 2011 and 2010, respectively.

At December 31, 2012, 2011 and 2010, if the Philippine peso had strengthened by 15.67%, 16.23% and 14.10% against the U.S. dollar with all other variables held constant, profit before tax for the year would have been lower by P12.1 million, P14.7 million and P15.7 million, respectively, mainly as a result of foreign currency loss on translation of U.S. dollar-denominated cash and cash equivalents.

On the other hand, if the peso had been weaker by the same percentage, with all other variables held constant, profit before tax would have been higher by the same amount in each of those years.

The percentage changes in rates have been determined based on the average market volatility in exchange rates, using standard deviation, in the previous 12 months, estimated at 99% level of confidence. The sensitivity analysis is based on the Group's foreign currency financial instruments held at the end of reporting period.

Exposures to foreign exchange rates vary during the year depending on the volume of transactions. Nonetheless, the analysis above is considered to be representative of the Group's foreign currency risk.

26.2 Interest Rate Risk

The Group's policy is to minimize interest rate cash flow risk exposures on long-term financing. The Group's interest rate risk largely arises from cash and cash equivalents and interest-bearing loans and borrowings, which are subject to variable interest rates. All other financial assets and liabilities have fixed rates.

The following paragraph presents the sensitivity of the net result for the year and equity to a reasonably possible change in interest rate of +/- 1.53% and +/- 3.65% for cash and cash equivalents and interest-bearing loans and borrowings, respectively, in 2012, +/- 0.66% and +/- 0.76% for cash and cash equivalents and interest-bearing loans and borrowings, respectively, in 2011 and, +/- 0.39% and +/- 0.87% for cash and cash equivalents and interest-bearing loans and borrowings, respectively, in 2010. These changes are considered to be reasonably possible based on observation of current market conditions. The calculation is based on changes in the average market interest rates for the period, and the financial instruments held at the end of each reporting period that are sensitive to changes in interest rates. All other variables are held constant.

If the interest rates were to increase, net profit before tax would increase by P31.6 million in 2012 and decrease by P2.9 million and P13.6 million in 2011 and 2010, respectively. If interest rates were to decrease, net profit before tax would decrease in 2012 and increase for the year in 2011 and 2010 by the same amounts.

The movements in interest rates used in the sensitivity analysis are considered reasonably possible and are based on observation of interest rate fluctuations for the past 12 months using a 99%-confidence level. The calculations are based on the Group's financial instruments held at the end of each reporting period, with effect estimated from the beginning of the year.

26.3 Credit Risk

Generally, the maximum credit risk exposure of financial assets is the carrying amount of the financial assets as shown on the face of the consolidated statements of financial position (or in the detailed analysis provided in the notes to the consolidated financial statements), as summarized below:

	<u>Notes</u>	<u>2012</u>	<u>2011</u>
Cash and cash equivalents	5	P 3,033,222,982	P 827,666,321
Trade and other receivables – net (excluding advances to suppliers and contractors)	6	4,208,570,334	3,673,422,446
Advances to landowners and joint venture	8	822,584,793	940,216,193
Advances to related parties	22	<u>1,687,392,195</u>	<u>1,631,182,339</u>
		<u>P 9,751,770,304</u>	<u>P 7,072,487,299</u>

None of the Group's financial assets are secured by collateral or other credit enhancements, except for cash and cash equivalents and trade receivables under Trade and Other Receivables, as described below.

(a) Cash and Cash Equivalents

The credit risk for cash and cash equivalents is considered negligible, since the counterparties are reputable banks with high quality external credit ratings. Included in the cash and cash equivalents are cash in banks and short-term placements which are insured by the Philippine Deposit Insurance Corporation up to a maximum coverage of P500,000 for every depositor per banking institution.

(b) *Trade and Other Receivables*

In respect of trade and other receivables, the Group is not exposed to any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. Trade receivables consist of a large number of customers in various industries and geographical areas. Majority of the trade receivables are secured by postdated checks and titles to residential units sold to buyers are retained to the Group until balance is fully paid. Based on historical information about customer default rates, management consider the credit quality of trade receivables that are not past due or impaired to be good.

Some of the unimpaired trade receivables are past due as at the end of the reporting period. The trade receivables that are past due but not impaired are as follows:

	<u>2012</u>	<u>2011</u>
Not more than 3 months	P 35,590,337	P 40,654,163
More than 3 months but not more than 6 months	173,049,418	141,953,949

	<u>P 461,720,165</u>	<u>P 401,064,591</u>

(c) *Advances to related parties, landowners and joint ventures*

The Group is not exposed to significant credit risk as advances are made to reputable entities.

The table below shows the credit quality by class of financial assets as of December 31, 2012.

	<u>Neither Past Due nor Specifically Impaired</u>			Past Due or	<u>Total</u>

The Group continuously monitors defaults of customers and other counterparties, identified either individually or by group, and incorporate this information into its credit risk controls. The Group's policy is to deal only with creditworthy counterparties. In addition, for a significant proportion of sales, advance payments are received to mitigate credit risk.

The Group's management considers that all the above financial assets that are not impaired for each of the reporting dates under review are of good credit quality, including those that are past due.

26.4 Liquidity Risk

The Group manages its liquidity needs by carefully monitoring scheduled debt servicing payments for long-term financial liabilities as well as cash outflows due in a day-to-day business. Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Long-term liquidity needs for 6-month and one-year periods are identified monthly.

The Group maintains cash to meet its liquidity requirements for up to 60-day periods. Excess cash is invested in time deposits, mutual funds or short-term marketable securities. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to sell long-term financial assets.

As at December 31, 2012, the Group's financial liabilities have contractual maturities which are presented below.

	Current		Non-current	
	Within	6 to 12	1 to 5	After
	6 Months	Months	Years	5 Years
Interest-bearing loans and borrowings	P 170,684,851	P -	P 413,846,258	P -

	P 4,116,891,831	P -	P 413,846,258	P -

This compares to the maturity of the Group's financial liabilities as of December 31, 2011.

	Current		Non-current	
	Within	6 to 12	1 to 5	After
	6 Months	Months	Years	5 Years
Interest-bearing loans and borrowings	P 248,890,267	P -	P 680,742,155	P -

Other current liabilities	131,386,380	-	-	-
	P 1,596,344,999	P -	P 680,742,155	P -

The above contractual maturities reflect the gross cash flows, which may differ from the carrying values of the liabilities at the end of each reporting period.

26.5 Other Market Price Risk

The Group's market price risk arises from its investments carried at fair value (classified as AFS financial assets). It manages its risk arising from changes in market price by monitoring the changes in the market price of the investments.

For equity securities listed in the Philippines, an average volatility of 11.67%, 33.63% and 47.93% has been observed during 2012, 2011 and 2010. If quoted price for these securities increased or decreased by that amount, profit before tax would have changed by P220.3 million in 2012, P516.8 million in 2011 and P824.3 million in 2010.

The investments in listed equity securities are considered long-term strategic investments. In accordance with the Group's policies, no specific hedging activities are undertaken in relation to these investments. The investments are continuously monitored and voting rights arising from these equity instruments are utilized in the Group's favor.

The Group is subject to equity securities price risk because of investments held by the Group and classified on the consolidated statement of financial position as AFS financial assets.

The Group is not subject to commodity price risk.

27. CATEGORIES AND FAIR VALUES OF FINANCIAL ASSETS AND LIABILITIES

27.1 Comparison of Carrying Amounts and Fair Values

The carrying amounts and fair values of the categories of assets and liabilities presented in the consolidated statements of financial position are shown below.

See Notes 2.4 and 2.8 for a description of the accounting policies for each category of financial instruments. A description of the Group's risk management objectives and policies for financial instruments is provided in Note 26.

27.2 Fair Value Hierarchy

The fair value of the Group's AFS financial assets was based on Level 1 representing quoted prices (unadjusted) in active markets for identical assets or liabilities amounting to P1.9 billion and P1.7 billion as of December 31, 2012 and 2011, respectively, presented as Available-for-sale financial assets in the statements of financial position. On the other hand, Level 3 representing inputs that are based on unobservable inputs amounting to P2.7 million is presented under Other non-current assets.

28. CAPITAL MANAGEMENT POLICIES AND PROCEDURES

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

Capital components for cost of capital purposes include loans and borrowings, preferred stock, common equity and retained earnings. The Group may issue new shares and may prepay some of its interest-bearing loans. Further, it intends to allocate its earnings and available cash in the acquisition and development of new/existing properties to ensure continuous business activities.

The Group monitors its capital gearing by measuring the ratio of Interest-bearing loans and borrowings to total capital. As of December 31, 2012 and 2011, the Group's ratio of Interest-bearing loans and borrowings to equity is as follows:

	<u>2012</u>	<u>2011</u>
Interest-bearing loans and borrowings	P 389,883,462	P 639,247,679
Total Equity	<u>22,267,128,859</u>	<u>19,055,425,444</u>
Debt-to-equity ratio	<u>0.02 : 1</u>	<u>0.03 : 1</u>

The Group has complied with its covenant obligations, including maintaining the required debt-to-equity ratio for both years (see Note 14.1).
